USER GUIDE

Admin Portal Guide

Run every booking, car, owner and dollar of CarmaCars from one place.

Drive your carma.

October 2026 edition

BEFORE YOU BEGIN

Start here

Who this guide is for

CarmaCars Admins: the owner of the business and anyone an Admin invites with the Admin role. Admin sees and changes everything, and can open any other portal as one of its people.

What you need

- Your Admin email address. The owner's account is rent@carmacars.ca
- Access to that inbox (links work for 24 hours, once)
- A computer for most work. Admin also works on a phone, with the menu as one scrolling strip

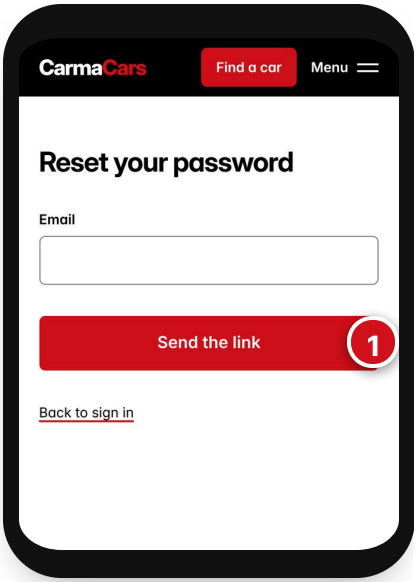

SIGN IN AT

carmacars.ca/sign-in?next=/admin

You land on Today, the Admin dashboard.

Your first sign-in

1. First time? Go to carmacars.ca/reset-password, enter your Admin email and press **Send the link**.
2. Open the email "Reset your CarmaCars password" within 24 hours and press **Choose a new password**.
3. Type a New password of 8 characters or more and press **Save the new password**. You land in Admin.
4. Next time, sign in at carmacars.ca/sign-in with that email and password.

> GOOD TO KNOW
>
> A link that has expired or was already used opens "This link has expired" with **Send me a new link**. Invited by another Admin? The invitation email works the same way.

INSIDE

Contents

→ **Start here** 2
Who this is for and your first sign-in.

01 **Getting around Admin** 5
Today, the rail, keyboard shortcuts and your other portals.

02 **People and access** 7
Portals and sign-in, invitations, password links, View as, staff and scorecards.

03 **Requests, offers and bookings** 14
Answer a request with an offer, run a booking, and propose a change.

04 **Calendars** 19
The master calendar, moving bookings, blocks, cleaning time and a car's calendar.

05 **Fleet and listings** 21
Vehicles, the listing pipeline, similar cars and covering licence plates.

06 **Partners, company cars and rentals added by hand** 25
Add a car, partners, add a rental, retire or delete a car, sample cars and tolls with two rentals.

07 **Owners and onboarding** 29
Applications, terms, an owner's page, sign-in help and Forms C and D.

08 **Owner money** 33
Owner invoices, the automatic debit, statements, payouts and the company statement.

09 **Tolls and tickets** 38
The work queue, reading a notice, checking its lines and charging the right person.

10 **Settings** 41
Site, program settings, official forms mapping, insurers and the other lists.

11 **Email, backups and site health** 46
The email outbox and daily limit, suppressions, backups and Error 1102.

Quick reference 48
One page with the essentials.

CHAPTER 1

Getting around Admin

Admin opens on Today: what needs you now. The rail on the left groups every screen into Operate, Fleet, Money, Recover, People and Setup.

Today

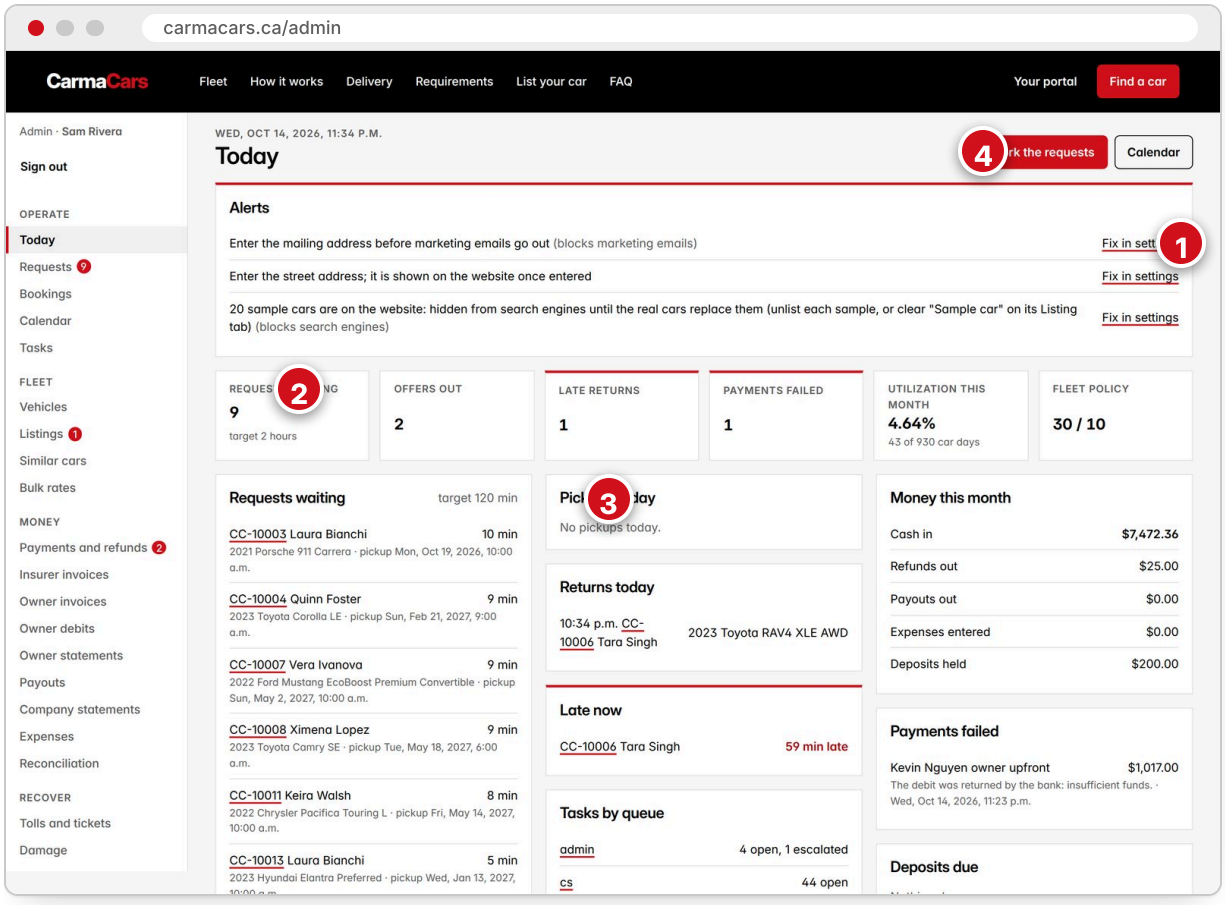

Start every shift here.

1 Alerts: site setup still to finish, failed scheduled jobs and email use. Each has a link to fix it.

2 The tiles count requests waiting, offers out, late returns, failed payments and fleet use.

3 Requests waiting, pickups and returns today, late returns and money this month.

4 Press **Work the requests** to go straight to the queue, or **Calendar** for the master calendar.

The rail

On a phone the rail becomes one scrolling strip at the top.

Group	Screens
Operate	Today, Requests, Bookings, Calendar, Tasks
Fleet	Vehicles, Listings, Similar cars, Bulk rates
Money	Payments and refunds, Insurer invoices, Owner invoices, Owner debits, Owner statements, Payouts, Company statements, Expenses, Reconciliation
Recover	Tolls and tickets, Damage, Incidents and claims
People	Portals and sign-in, Staff, Owners, Owner forms, Investors, Reviews, Email, Audit log
Setup	Settings

Keyboard shortcuts

Press g, then a letter. Press / to jump to the page's search box.

Keys	Opens	Keys	Opens
g t	Today	g v	Vehicles
g r	Requests	g l	Listings
g b	Bookings	g m	Money
g c	Calendar	g o	Tolls
g k	Tasks	g s	Settings

CHAPTER 2

02 People and access

Let people in, help them back in when they are locked out, and see exactly what they see. Every step is recorded in the audit log.

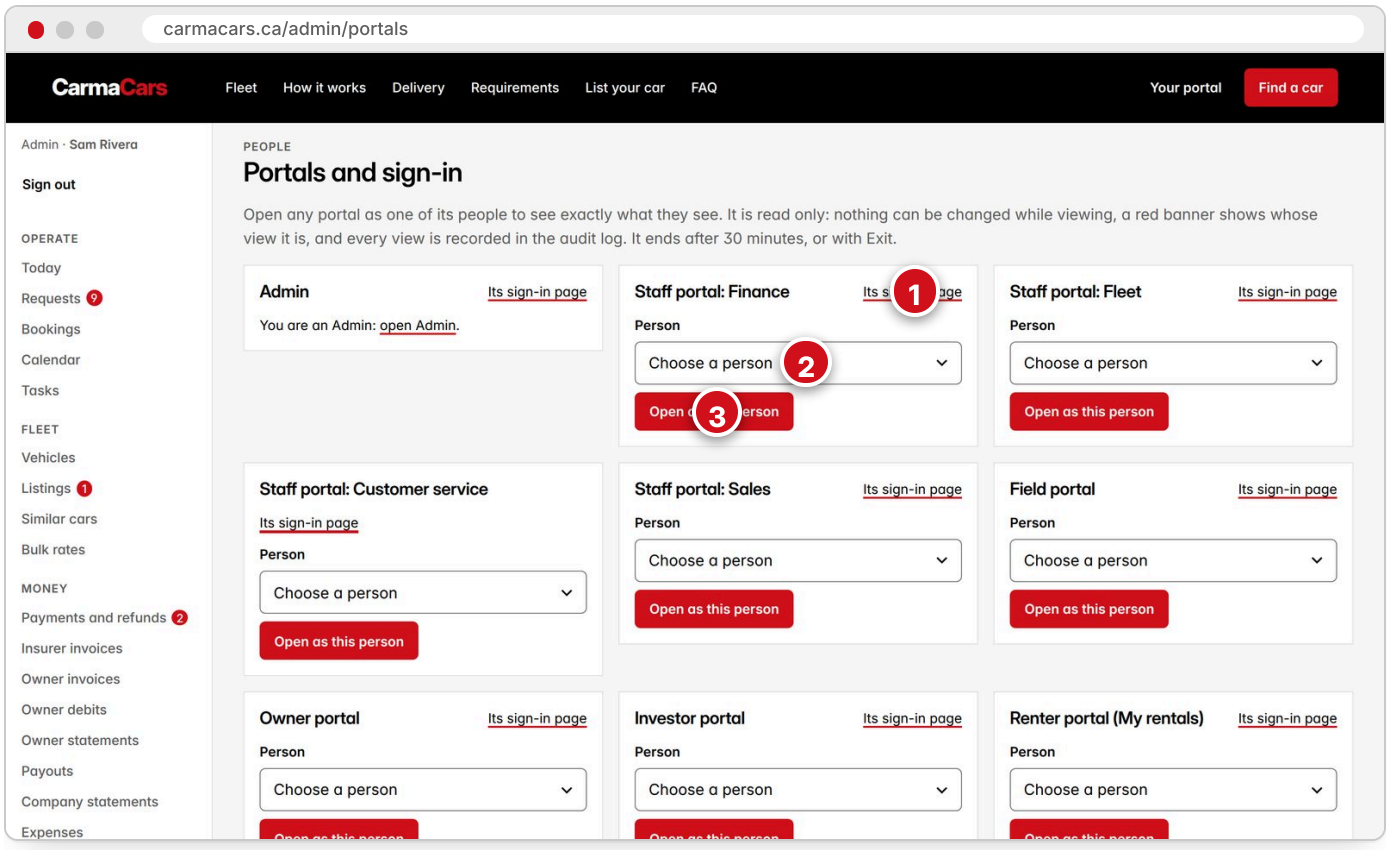

Portals and sign-in

Open **People** › **Portals and sign-in**. Every portal has a card.

1 Each card links to **Its sign-in page**, the address to send that person.

2 Choose a person in the list on the card.

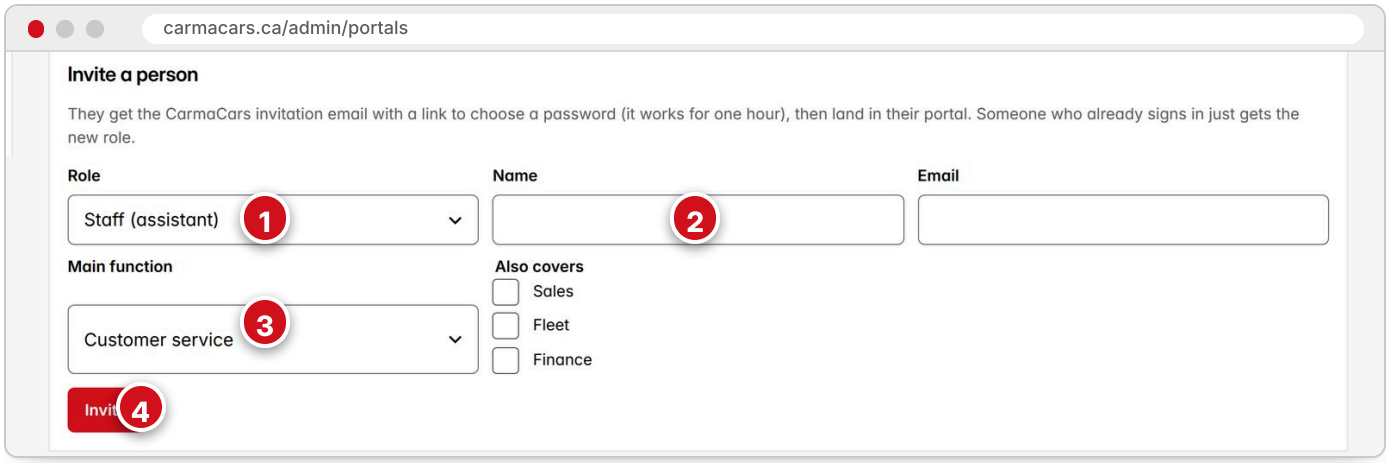

3 Press **Open as this person** to see that portal as they see it.

Invite a person

Invitations work for every role. The person gets our invitation email and chooses a password.

1. Under Invite a person, choose the Role: Admin, Staff (assistant), Field staff, Owner on file or Investor on file.
2. Fill in the Name and Email.
3. For staff, pick the Main function, and tick Also covers for any other function they help with. For field staff, pick the Field function.
4. Press **Invite**. The link in the email works for 24 hours.

TIP

Someone who already signs in gets the new role at once, with no email. Owners and investors must be on file first: Admin > Owners and Admin > Investors also have a one-click invite for a record without a sign-in.

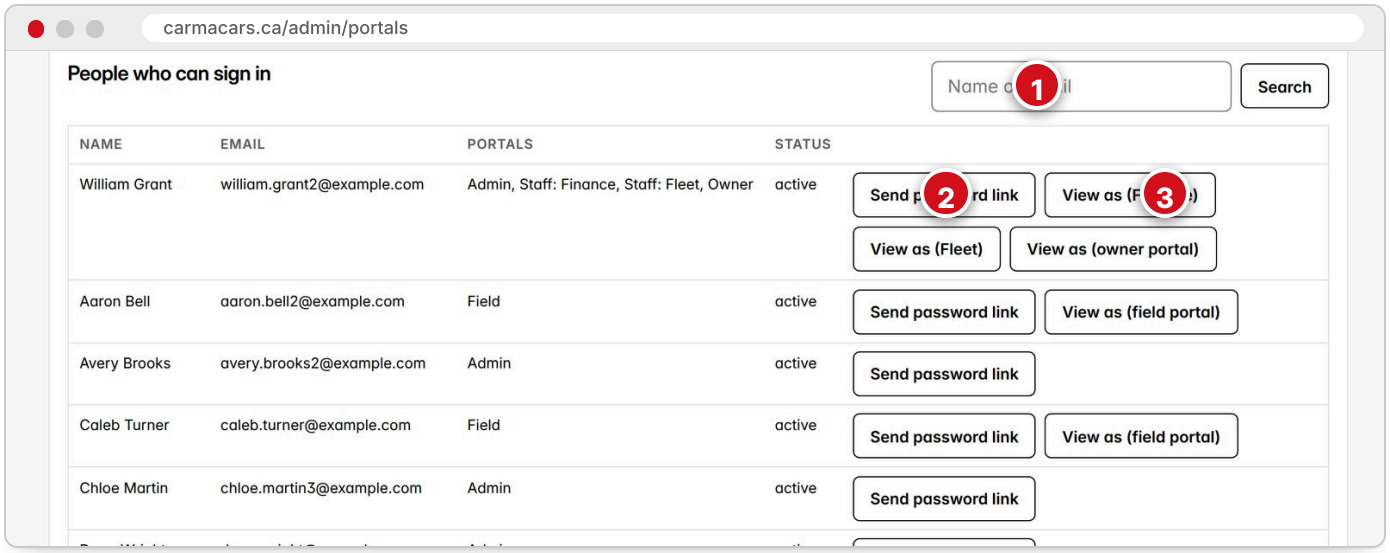

Send a password link

For anyone who forgot their password or let their invitation expire.

1 Under People who can sign in, search by name or email.

2 On their row, press **Send password link**. They get "Reset your CarmaCars password", valid for 24 hours.

3 **View as (...)** on the same row opens their portal, read only.

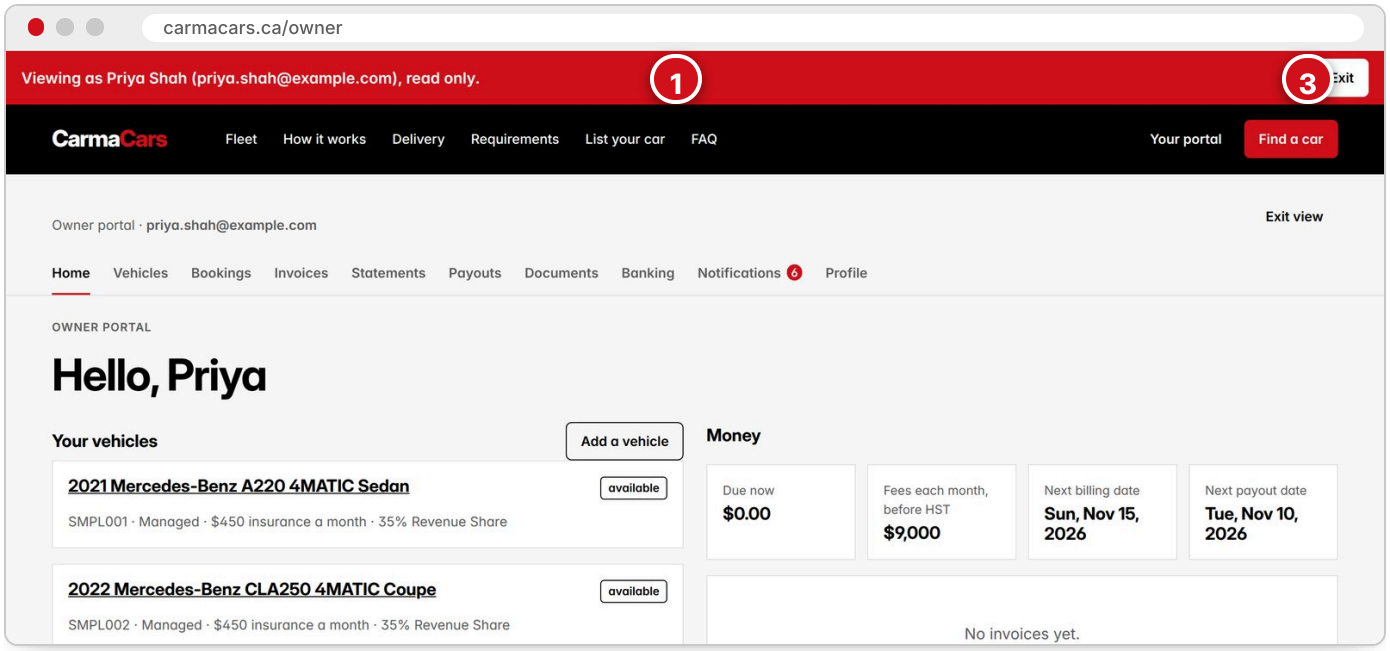

View as: see what someone sees

1 A red banner says "Viewing as Name (email), read only." on every page.

2 Click around their portal. Nothing can be changed: every save is refused.

3 Press **Exit** to come back. A view also ends by itself after 30 minutes.

WATCH OUT Can't change anything in Admin? You may still be viewing as someone. Look for the red banner and press Exit.

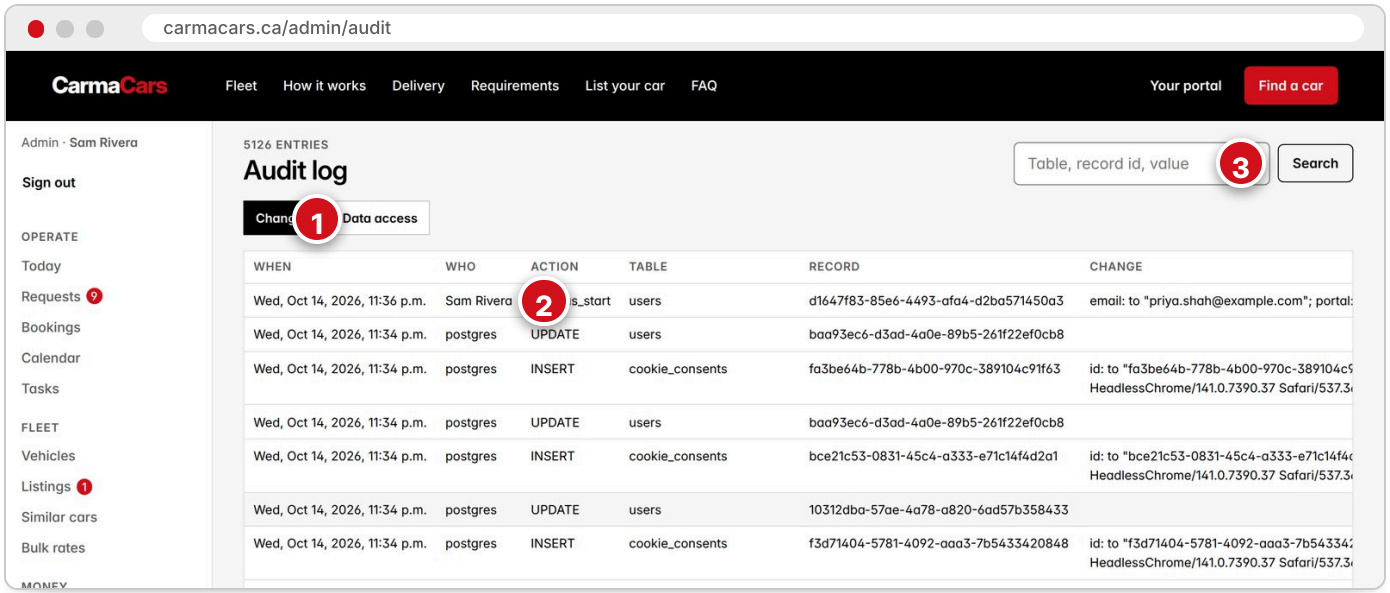

The audit log

People › Audit log shows who changed what, and when.

1 Changes lists every change with the person, the action, the table and the record. Data access lists lookups of private data.

2 Every View as is recorded (view_as_start), with the person viewed.

3 Search by table, record id or value.

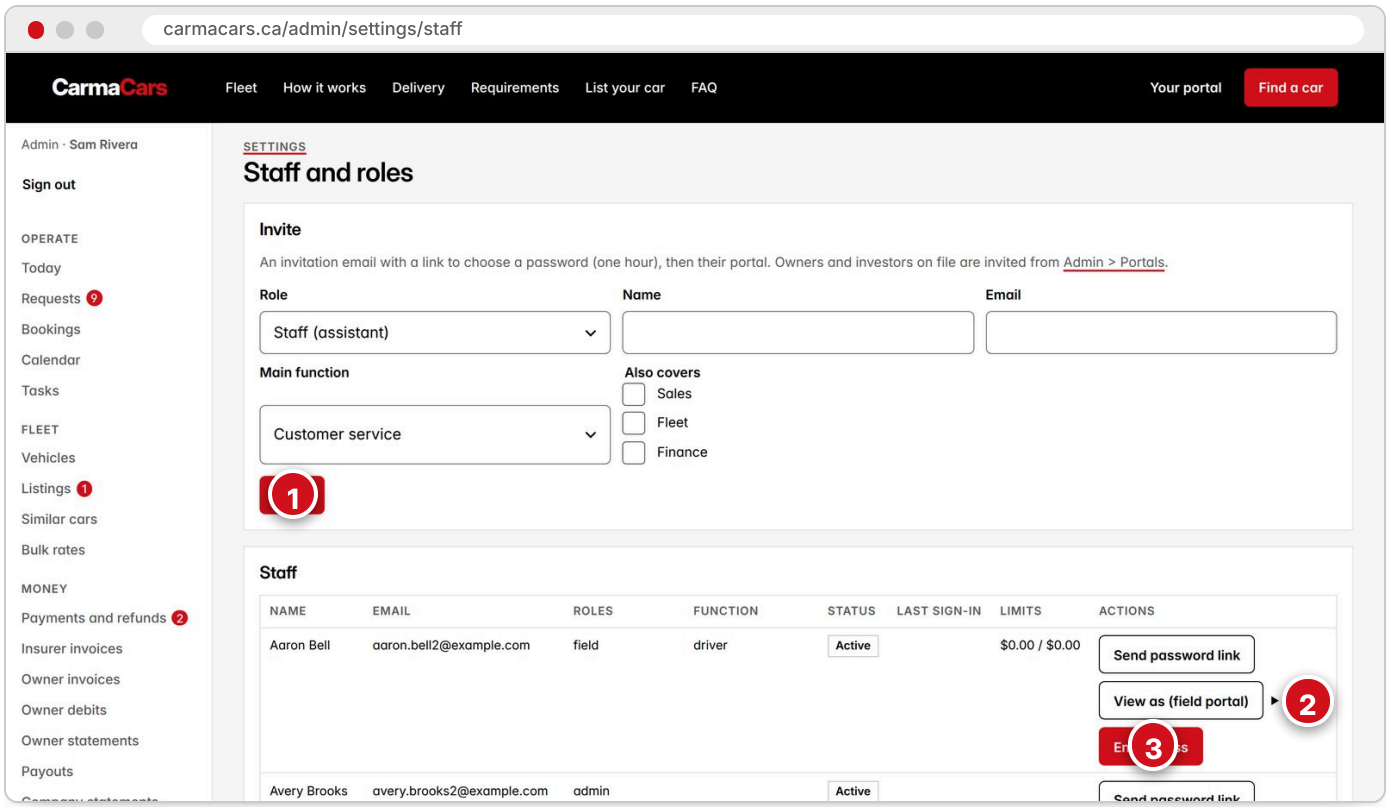

Staff and roles

Settings › Staff and roles (also under **People › Staff**).

1 Invite staff here too: Role, Name, Email, Main function and Also covers, then **Invite**.

2 Each row has **Send password link**, **View as (...)** and Limits (how much they may approve or refund).

3 Press **End access** to close their staff portal at once. **Restore** undoes it.

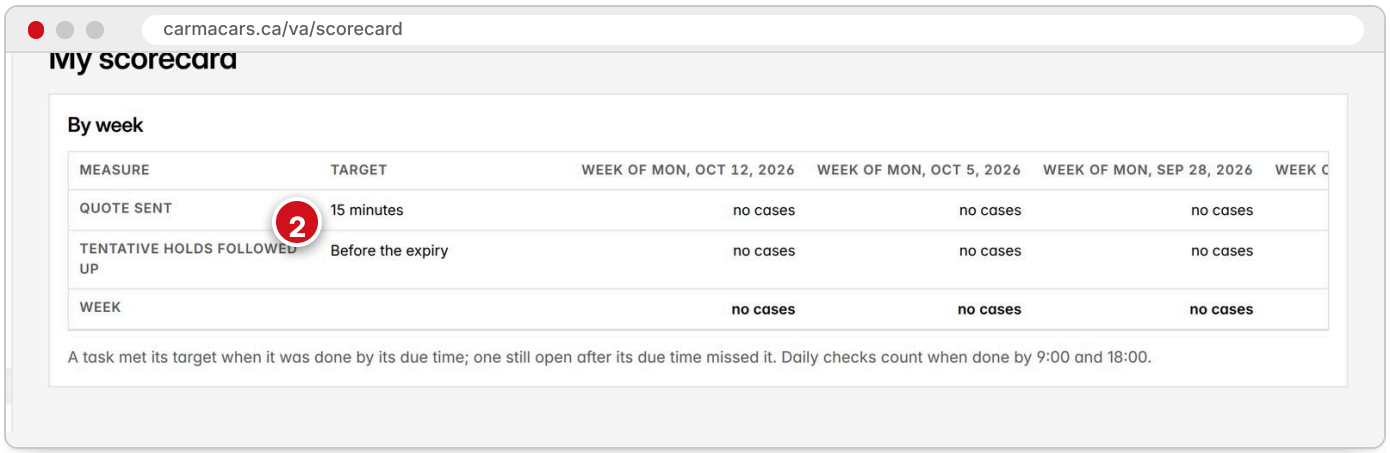

Staff scorecards

See how each assistant is doing against the targets.

1 On a staff member's row in Staff and roles, press **Scorecard**.

2 By week shows each measure (for example quote sent within 15 minutes) and the result for each week.

3 A task meets its target when it is done by its due time. Daily checks count when done by 9:00 and 18:00.

CHAPTER 3

03 Requests, offers and bookings

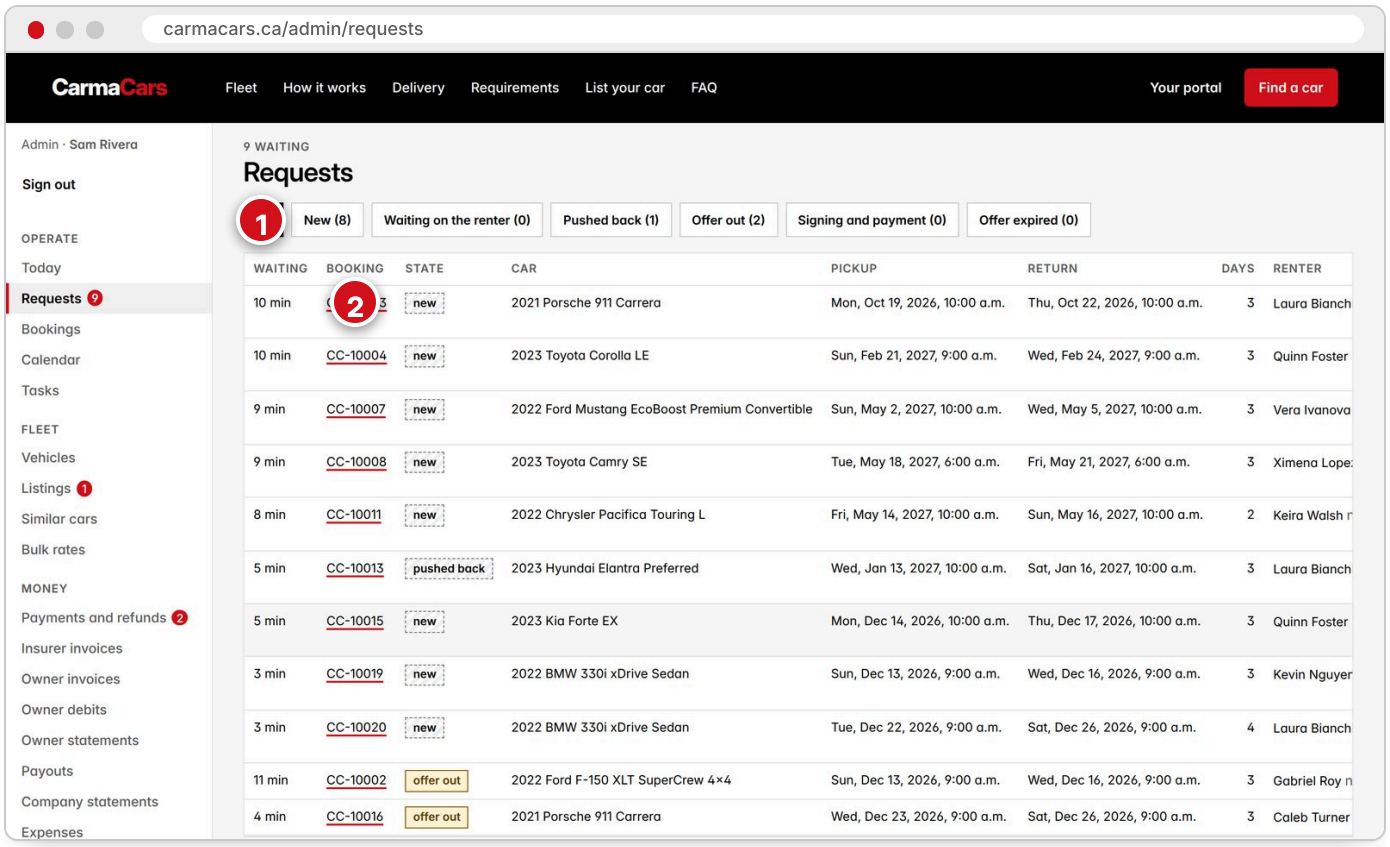

Every booking starts as a request. You check it, adjust it and send the offer. After that, the booking page holds the money, documents, changes and history.

The request queue

Open **Requests**. The oldest waiting request is at the top.

1 Filter by New, Waiting on the renter, Pushed back, Offer out, Signing and payment, or Offer expired.

2 Waiting shows how long the renter has waited. Open a booking number to answer it.

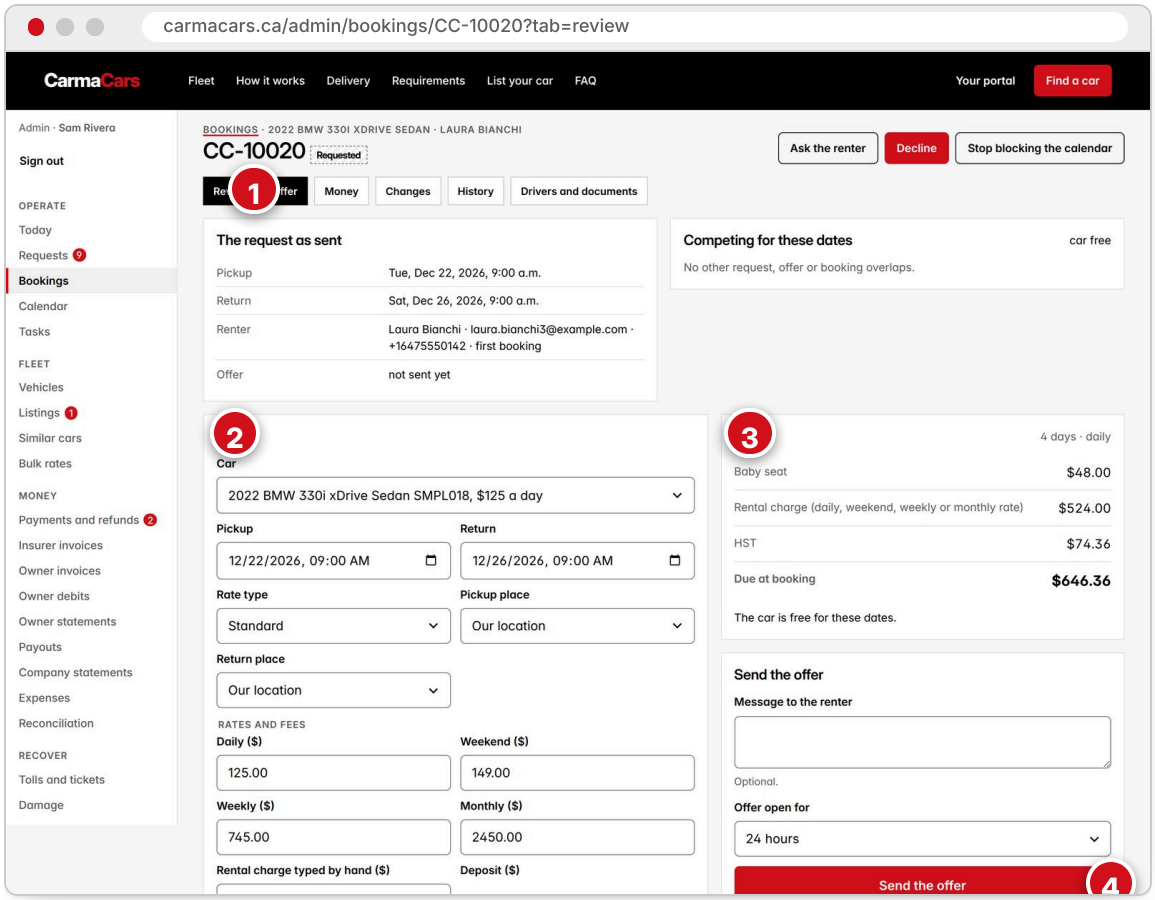

Answer a request with an offer

1 The Review and offer tab shows the request as the renter sent it.

2 Adjust the car, the dates, the rate type, the places, the rates and fees, the deposit and extras.

3 Price on the right updates as you change things.

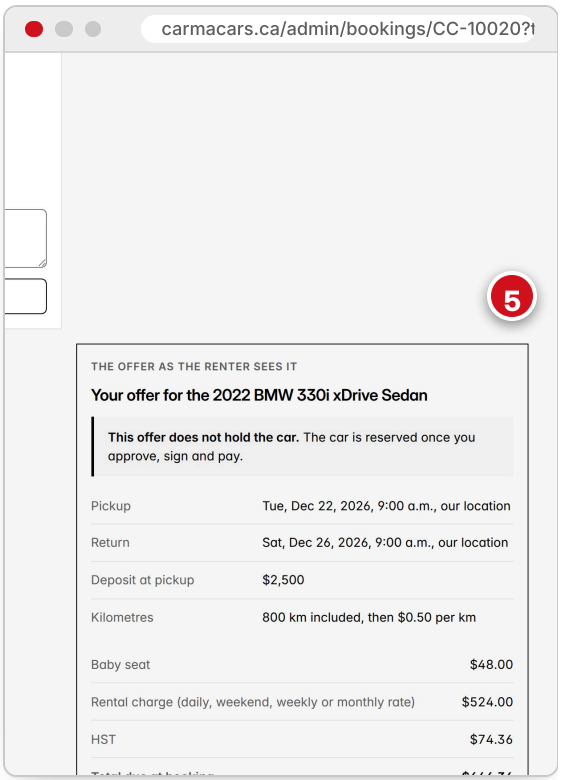

4 Add a message, choose how long the offer stays open, then press **Send the offer**.

5 Changed fields but not ready to send? Press **Save changes**. The panel "The offer as the renter sees it" shows the result.

6 Can't do it? Press **Decline** and fill in Reason and any alternative.

7 Need an answer first? Press **Ask the renter** to send a question.

TIP

After the offer is out: **Withdraw to edit** takes it back, **Send again, later expiry** gives the renter more time, and **Renter approved by phone** records a yes given on a call.

A booking

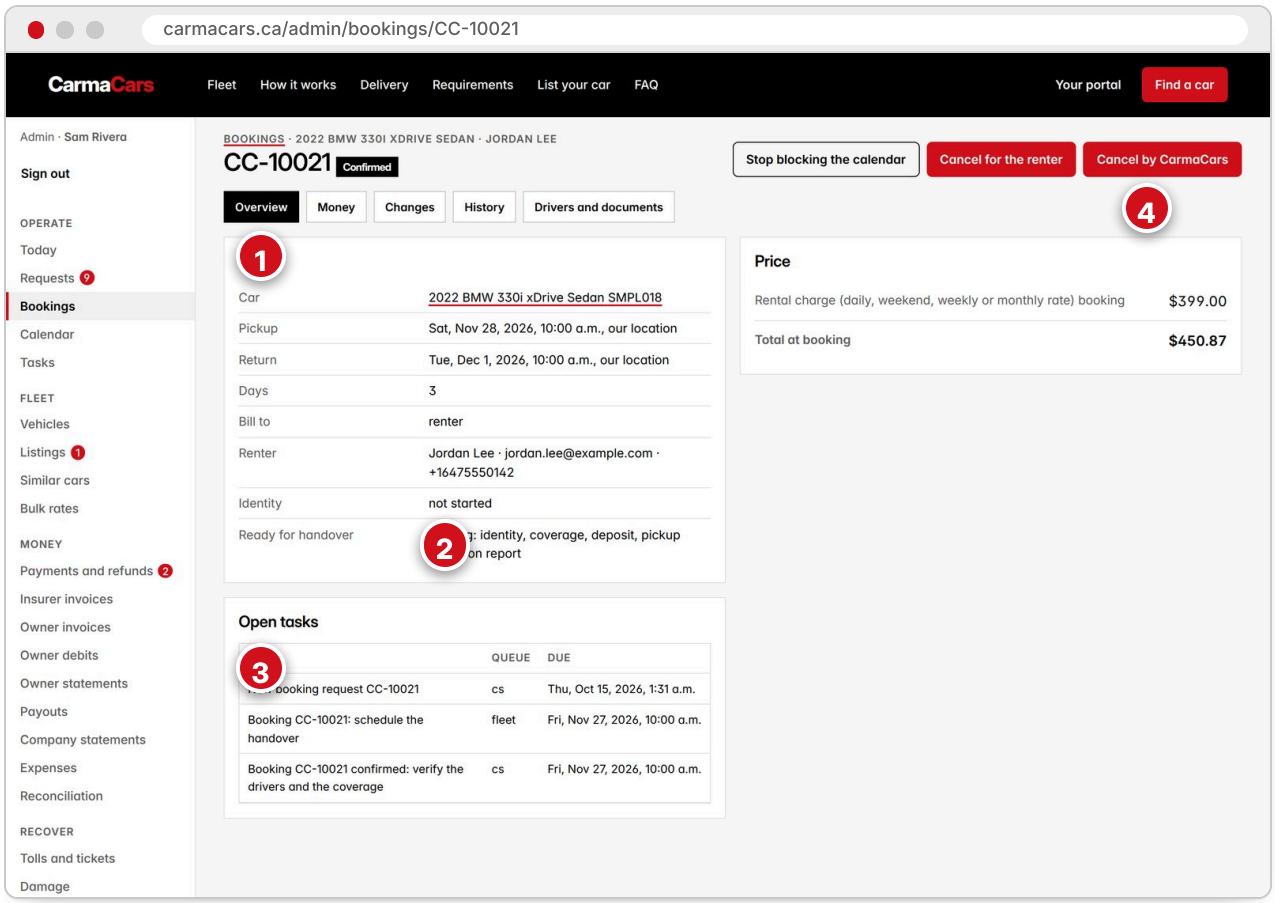

Open Bookings, then a booking number.

1 Tabs: Overview, Money, Changes, History, and Drivers and documents.

2 Overview shows the trip, the renter, what is still missing for the handover, and the price.

3 Open tasks for this booking, with the queue and the due time.

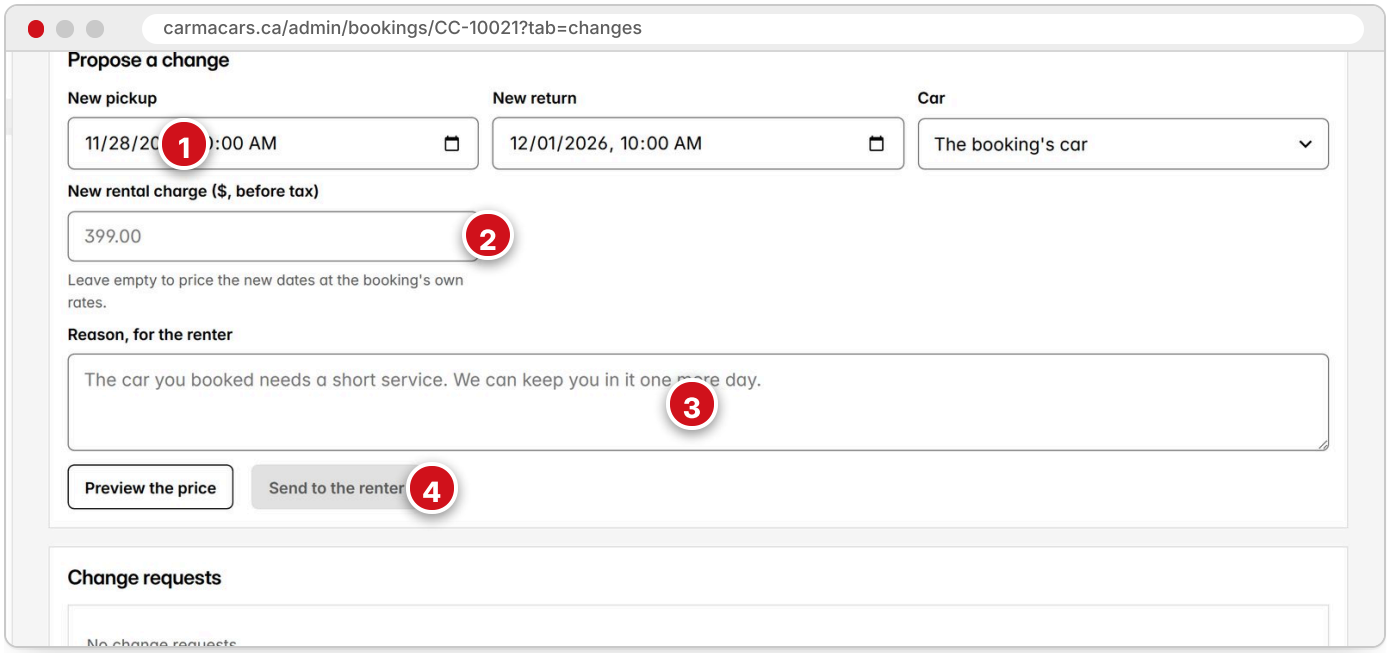

4 Top right: **Stop blocking the calendar**, **Cancel for the renter** and **Cancel by CarmaCars**.

Propose a change to a confirmed booking

The renter gets an email and answers on their booking. The calendar moves only when they accept.

1. Open the booking's Changes tab. Under Propose a change, set the new pickup, return or car.
2. To price it by hand, type a New rental charge before tax. Leave it empty to use the car's rates.
3. Write the Reason, for the renter. They read it.
4. Press **Preview the price**, then **Send to the renter**.

TIP

The renter has 48 hours to accept (and sign the amendment) or decline, with one reminder. Any extra is charged to their Card on File; a lower price raises a refund for your approval.

CHAPTER 4

04 Calendars

The master calendar shows every car, booking, request and block. Each car also has its own calendar and turnaround time.

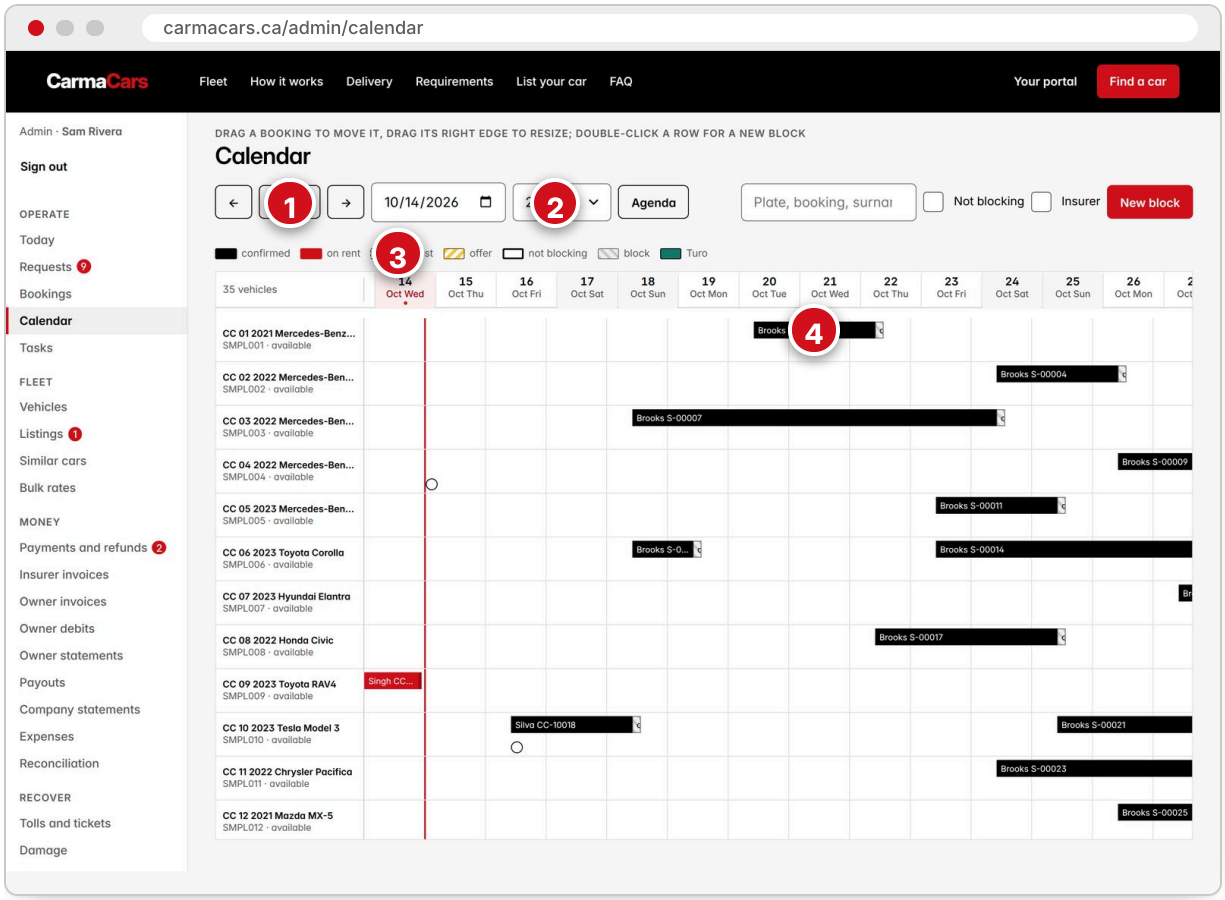

The master calendar

1 Move through time with the arrows and **Today**, or pick a date.

2 Choose the range: **Today**, **Week**, **2 weeks** or **Month**. **Agenda** shows a list instead.

3 The legend: confirmed, on rent, request, offer, not blocking, block and Turo.

4 Each row is a car. Bars are bookings and blocks; the red line is now.

Move a booking, add or remove a block

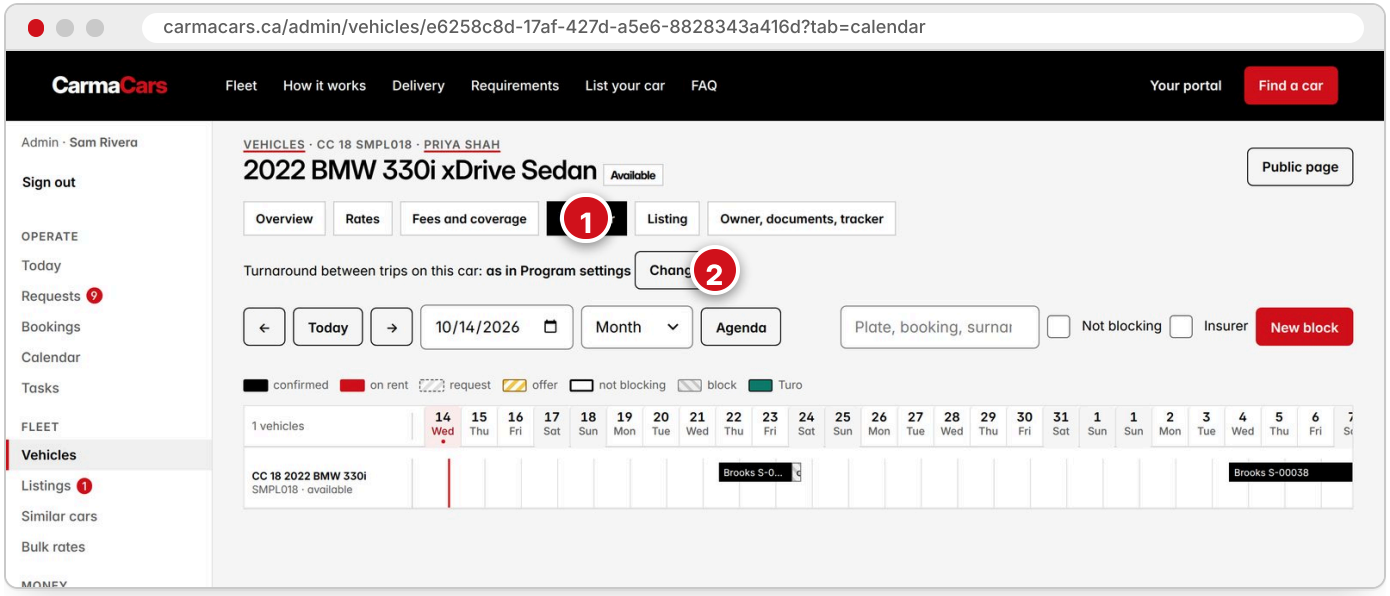

1. To move a booking, drag its bar to the new car or time, then press **Confirm the move**.
2. To block a car, double-click its row where the block starts, then press **Create the block**. **New block** at the top does the same.
3. To remove a block, open it and press **Remove the block**.

> **TIP** After every confirmed trip a cleaning block holds the car for its turnaround time. It follows changes and extensions and goes away with a cancellation. Remove it from the side panel if the car is ready sooner; that time is then free.

A car's own calendar

Vehicles › the car › Calendar

1. The Calendar tab shows only this car, with its bookings and blocks.
2. Turnaround between trips on this car shows the time used. Press **Change** to give this car its own time.

CHAPTER 5

05 Fleet and listings

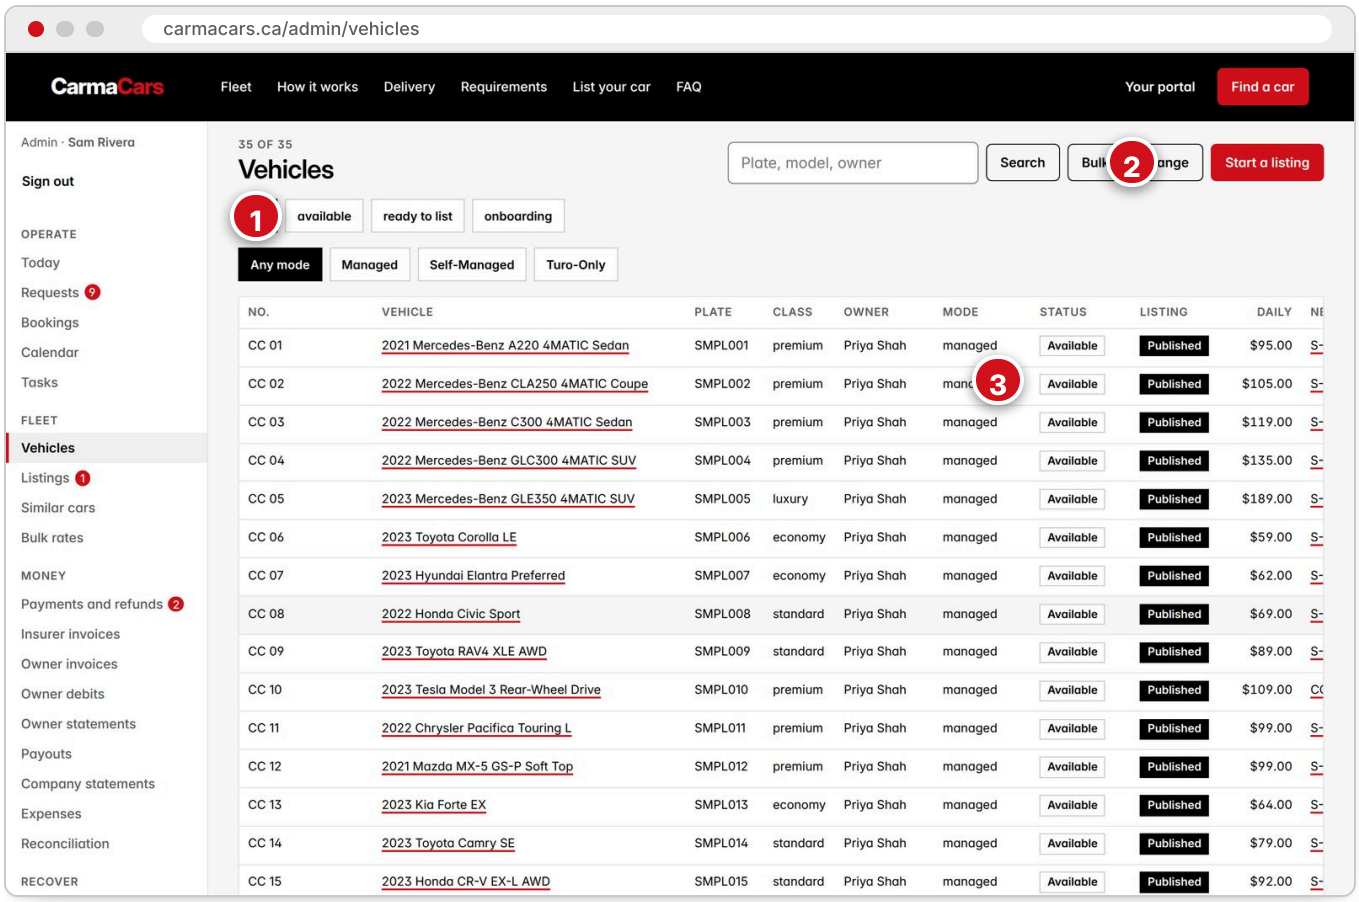

Vehicles is the fleet. Listings is the pipeline that turns a car into a page on carmacars.ca: photos, copy, a duplicate check and a covered plate on every public photo.

Vehicles

1 Filter by status and mode. Each row shows the plate, class, owner, mode, status, listing and daily rate.

2 Search by plate, model or owner. **Bulk rate change** changes rates of many cars at once.

3 Open a car for its tabs: Overview, Rates, Fees and coverage, Calendar, Listing, and Owner, documents, tracker.

COMING SOON The Tracker card on a car says "Coming soon": live location, the remote immobilize request and mileage from the tracker need the tracker company's connection first.

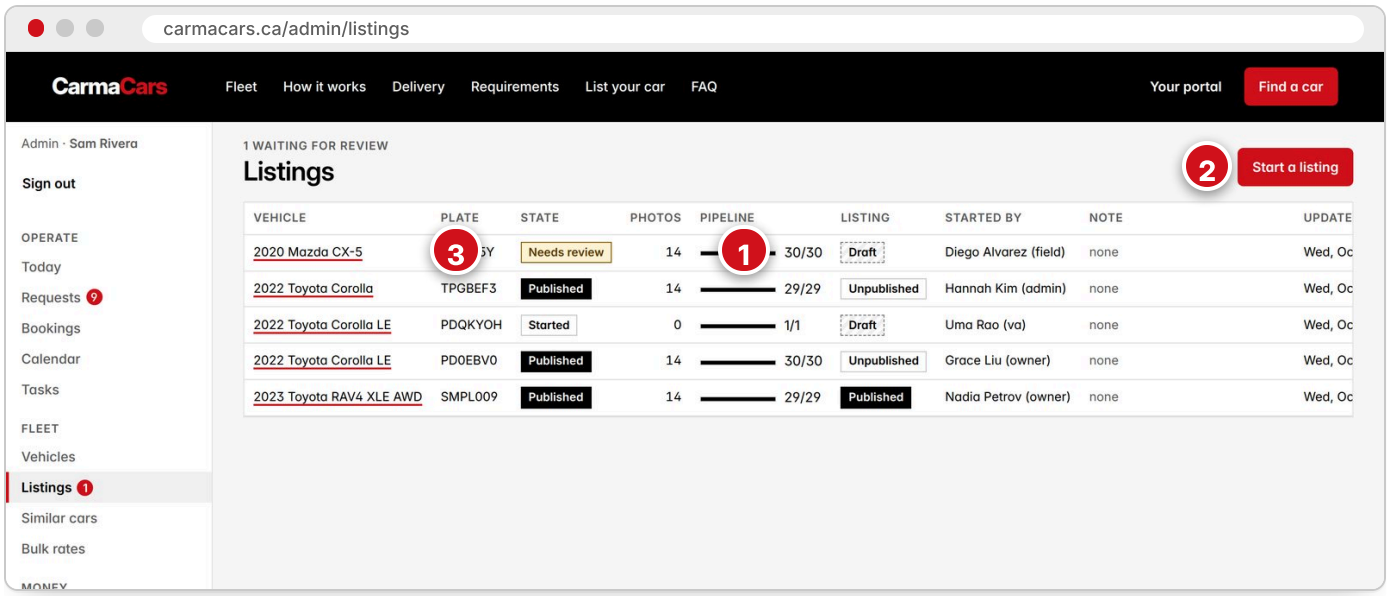

The listing pipeline

Open **Listings**. A draft waiting for review shows Needs review.

1 Each row shows the car, plate, state, photos and the pipeline's progress.

2 Press **Start a listing** to begin one for a car that has none.

3 Open a car to review it.

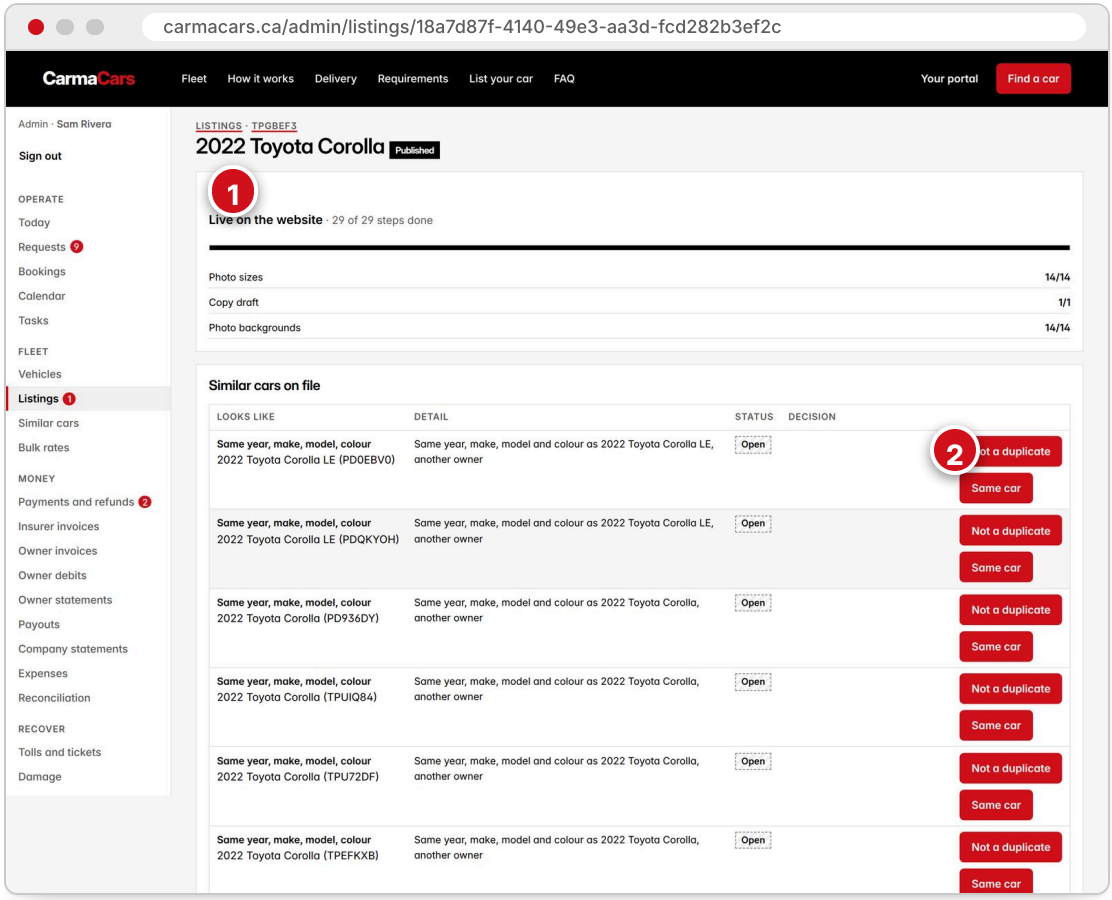

Review a listing

1 Pipeline shows each step done, such as photo sizes, copy draft and backgrounds.

2 Similar cars on file lists possible duplicates. Press **Not a duplicate** or **Same car**. An open flag stops publishing.

3 Check the copy: headline, description, features, questions, search title and description.

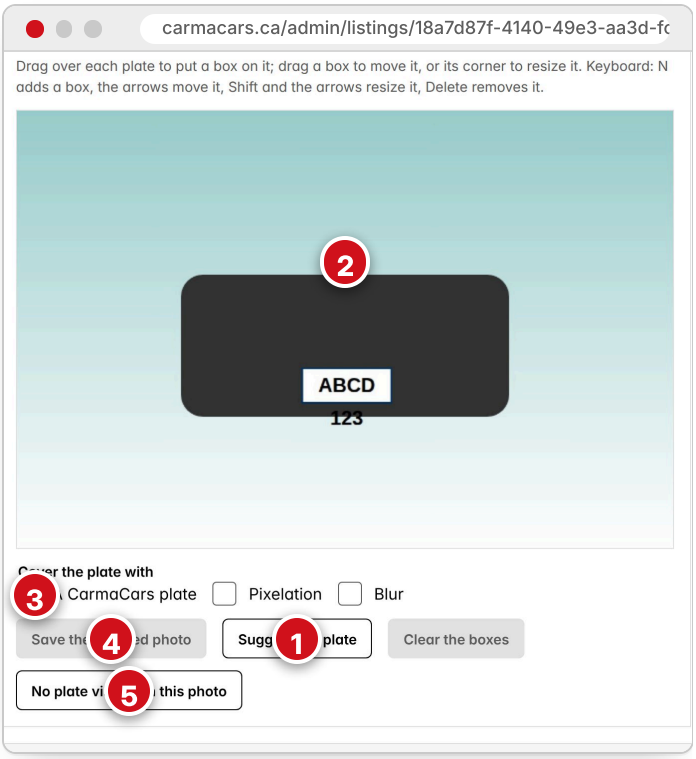

4 Under Photos, each public photo shows its plate state: Plate not checked, Plate covered or No plate visible.

Cover the licence plate

On each public photo press **Cover the plate**. The editor opens.

1. The editor suggests a box over the plate. Check it. **Suggest the plate** asks again.
2. Drag over a plate to draw a box. Drag a box to move it, or its corner to resize it.
3. Under Cover the plate with, choose **A CarmaCars plate**, **Pixelation** or **Blur**.
4. Press **Save the covered photo**. **Clear the boxes** starts over.
5. No plate in the shot? Press **No plate visible on this photo**.

> **TIP** The covered photo replaces the public one; the original is kept privately. Keyboard: N adds a box, the arrows move it, Shift and the arrows resize it, Delete removes it.

Publish

1. When every public photo is covered or marked, press **Approve and publish**.
2. Or press **Approve, publish later**, or **Send back** with what to fix.

> **WATCH OUT** Publishing waits for a plate decision on every public photo ("Cover the licence plate or mark it not visible on every public photo first"). Listings already live show "Plate not checked" until someone checks them.

CHAPTER 6

06 Partners, company cars and rentals added by hand

A car comes from one of three places: a program owner, CarmaCars itself, or a partner rental company. You add cars and rentals by hand, retire cars, and delete cars that were added by mistake.

Add a car

Vehicles › Add a car. First choose who supplies it.

1. **A program owner's car**: choose the owner. The car starts its onboarding (terms, agreements, registry) as if the owner had applied.
2. **CarmaCars-owned (company fleet)**: no owner. All of its revenue is CarmaCars' and it shows in the company statement as company fleet.
3. **A partner rental company's car**: choose the partner. Leave the commission empty to use the partner's, or type one for this car.
4. Type the VIN, the plate and the details, and the rates if you have them. Press **Add the car**.

> TIP
>
> The duplicate check runs as for every car: a VIN only once, a plate on one active car, and a likely twin waits for you in Similar cars before it is published.

On a car's page, **Who supplies the car** shows the supplier and the commission, and changes them. Vehicles filters by supply type.

Partners

People › Partners. Partner rental companies whose cars we rent out on commission.

1. Press **Add a partner**: business and legal name, contacts, HST number, commission and insurance with its expiry date.

2. Open a partner for its cars, bookings, statements, payouts and documents. A warning shows when its insurance expires soon, and Tasks gets a reminder (Program settings sets how many days before).

3. Banking (Admins only): **Save the payout account** for the account we pay the partner into. The account number is stored encrypted. Press **Verify** once checked.

4. Portal: **Invite to the owner portal** gives the partner the owner portal with its cars, bookings, statements and the partner agreement, filled in and signed on screen in three taps.

5. Signed on paper? Press **Print the partner agreement**, then record the signed scan under Record a paper signature.

> WATCH OUT The partner agreement is a draft for lawyer review. Use it only once it is approved.

Add a rental by hand

Bookings › Add a rental. For phone, walk-in, Turo, partner and insurer bookings.

1. Choose the car and the dates. The check shows clashes with other bookings and the cleaning time after each trip. An Admin may book over a clash with a reason.

2. Find the renter by name, email or phone, or add a new one: name, email, phone, date of birth and licence. Add any other drivers.

3. Check the price: the car's rates, extras, coverage and deposit. An Admin may set the price by hand; assistants use the rate sheet and the discounts allowed.

4. Choose Where it came from and how it is paid: **Paid another way**, **Send a payment link**, **Charge the saved card** or **Unpaid: invoice later**.

5. Press **Check the calendar and the price**. Tick **Do not email the renter** if they should not get the confirmation. Press **Add the rental**.

> TIP
>
> The rental is confirmed and on the calendars at once (a payment link waits for the payment). The renter signs the rental agreement in their portal, or on paper and you record it. On the booking, **Verified in person** records a licence checked at the counter. A past rental is recorded as completed.

Retire or delete a car

Vehicles › the car, then **Retire or delete**.

1. **Retire this car** takes the car off the site and the calendars and keeps every record. It needs no future confirmed booking. **Restore** brings it back.

2. **Delete this car** removes a car added by mistake, with its photos. Only a car with nothing tied to money (no booking, payment, statement, toll or damage). Type the plate or the name to confirm.

3. **Vehicles › Sample cars**, then **Delete all sample cars**, deletes every sample car that meets the rule at once. Type DELETE SAMPLE CARS to confirm; the ones kept show why.

Tolls when two rentals overlap

Bookings held for an insurer and other placeholders are never matched to a toll. When two real rentals overlap the toll time, nobody is charged automatically: the toll waits in the work queue under Two rentals, with both bookings, and you choose who pays.

CHAPTER 7

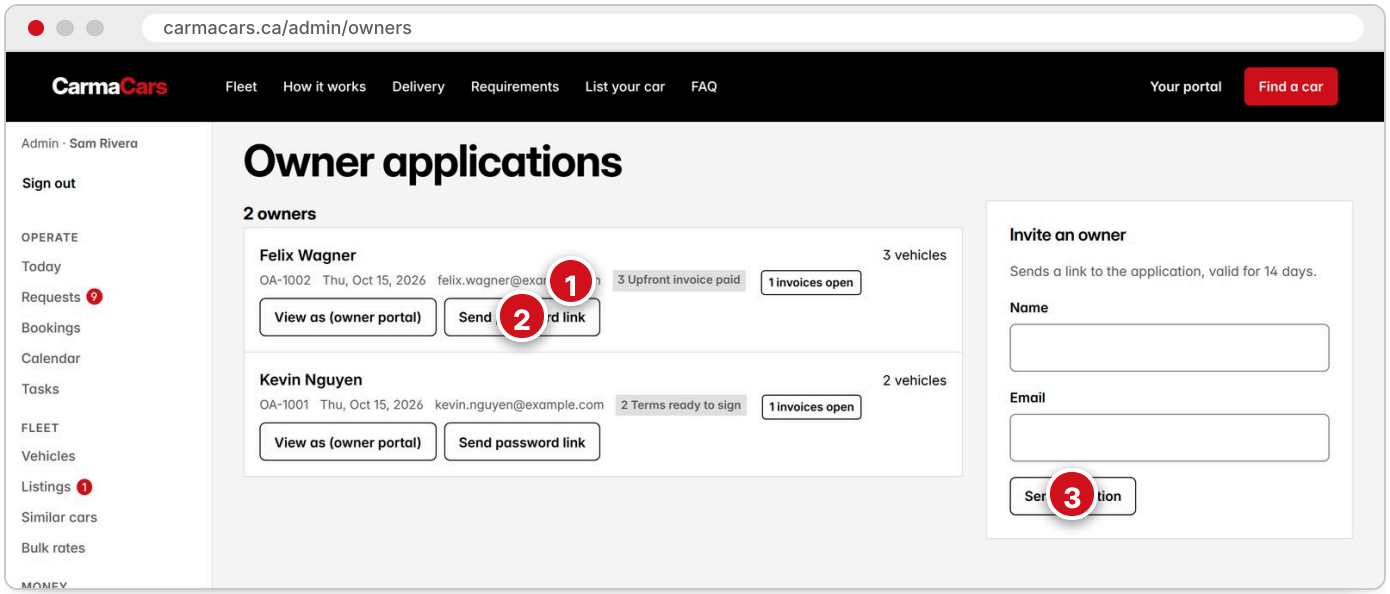

07 Owners and onboarding

Owners apply on the site. You approve them, set their terms, and check their forms. Their page shows everything about them in one place.

Owner applications

People › Owners

1. Each owner shows their application, how many cars, and where onboarding stands.
2. **View as (owner portal)** shows their portal. **Send password link** helps them sign in.
3. Invite an owner on file: fill in Name and Email under Invite an owner, then press **Send invitation**.

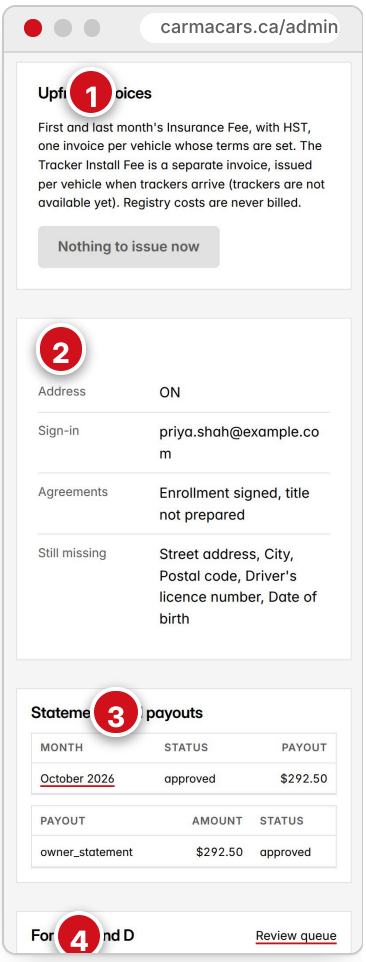

Approve an application and set terms

1. Open the application and press **Approve and set terms** (or **Set terms (standard grid)**).
2. The owner signs everything at once in their portal (Check and sign: the agreements, schedules, Forms A and B and the official forms that are ready, with one signature) and pays the upfront invoice.
3. Paid another way? On the invoice, press **Record payment** (see Paid and signed, below).

An owner's page

Open an owner from Owners. The details are in the right-hand column.

1. Upfront invoices: issue the first and last month's insurance fee for each car whose terms are set.
2. Owner: address, sign-in, agreements, and what is still missing for the registry forms.
3. Statements and payouts for this owner.
4. Forms C and D, with a link to the review queue.
5. Further down: **View as (owner portal)**, **Send password link** and **Send a sign-in link to the owner portal**.

Paid and signed

People › Owners, then **Paid and signed**. What each owner still has to pay or sign, and how each item was done.

1. Each owner shows how many items are open and how many are done. Owners with nothing left are hidden; press Show every owner to see them.

2. Open **Checklist and quick actions**. Each line says Signed in the portal, Signed on paper, Paid by e-Transfer, Not signed, and so on.

3. Paid by e-Transfer, cheque, cash or bank transfer? Press **Record payment**. Choose Paid by, the Date received and the Reference (the cheque number for a cheque). Leave Amount empty for the full balance, or type less for a partial payment. Add a photo of the cheque or a screenshot if you have one.

4. Signed on paper? Press **Record paper signature**. Choose the Document, check Signed by and Date signed, add the witnesses where the form needs them, and upload the scan of every signed page.

5. The same checklist sits at the top of each owner's page.

A recorded payment marks the invoice paid (or partly paid), stops the automatic debit for that amount, sends the owner a receipt, and shows "Paid by e-Transfer on " in their portal. A paper signature counts as signed everywhere: the checklist, onboarding and the owner portal. The scan is kept privately with the owner's documents.

> **WATCH OUT** Recorded the wrong thing, or a cheque bounced? Press **Void** beside it and give the reason. The invoice owes that amount again and the owner is told; a voided signature makes the item open again. Only an Admin can void.

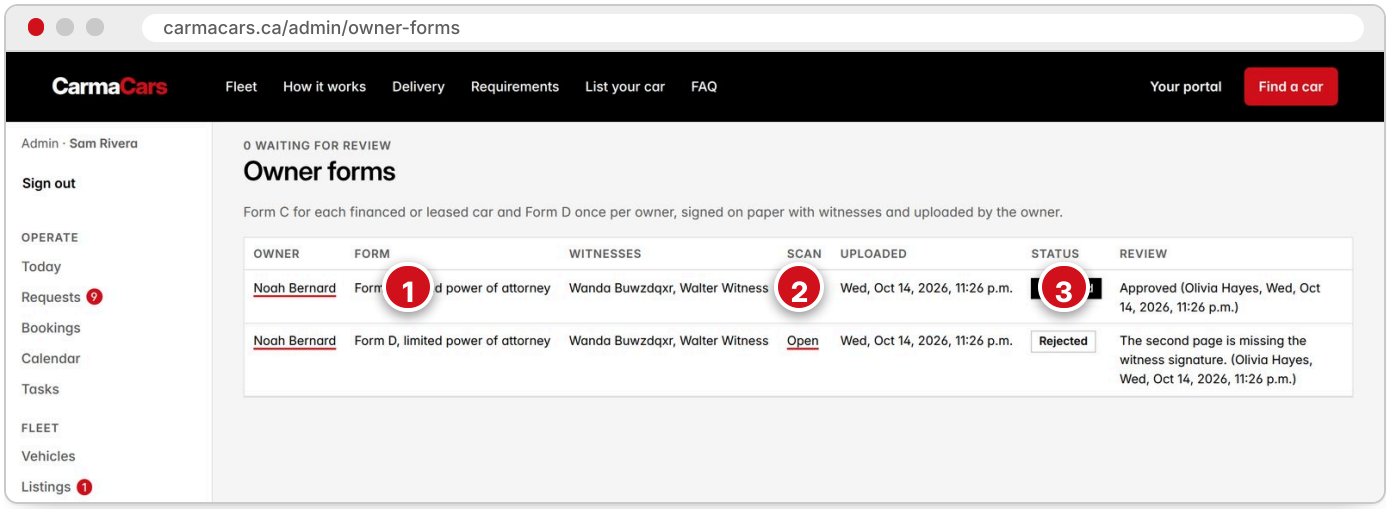

Forms C and D

People › Owner forms. Owners print them filled in, sign in front of witnesses and send a photo of each page from their phone.

1 Each row shows the owner, the form, the witnesses and when it was uploaded.

2 Press Open to read the photo or scan. Check each marked spot is signed or initialled.

3 Press **Approve**, or **Send back** with What to fix (the owner reads this).

CHAPTER 8

08 Owner money

Owner fee invoices are issued on the notice day and debited on the 15th. Statements are built, approved and issued each month, and payouts follow.

Owner invoices

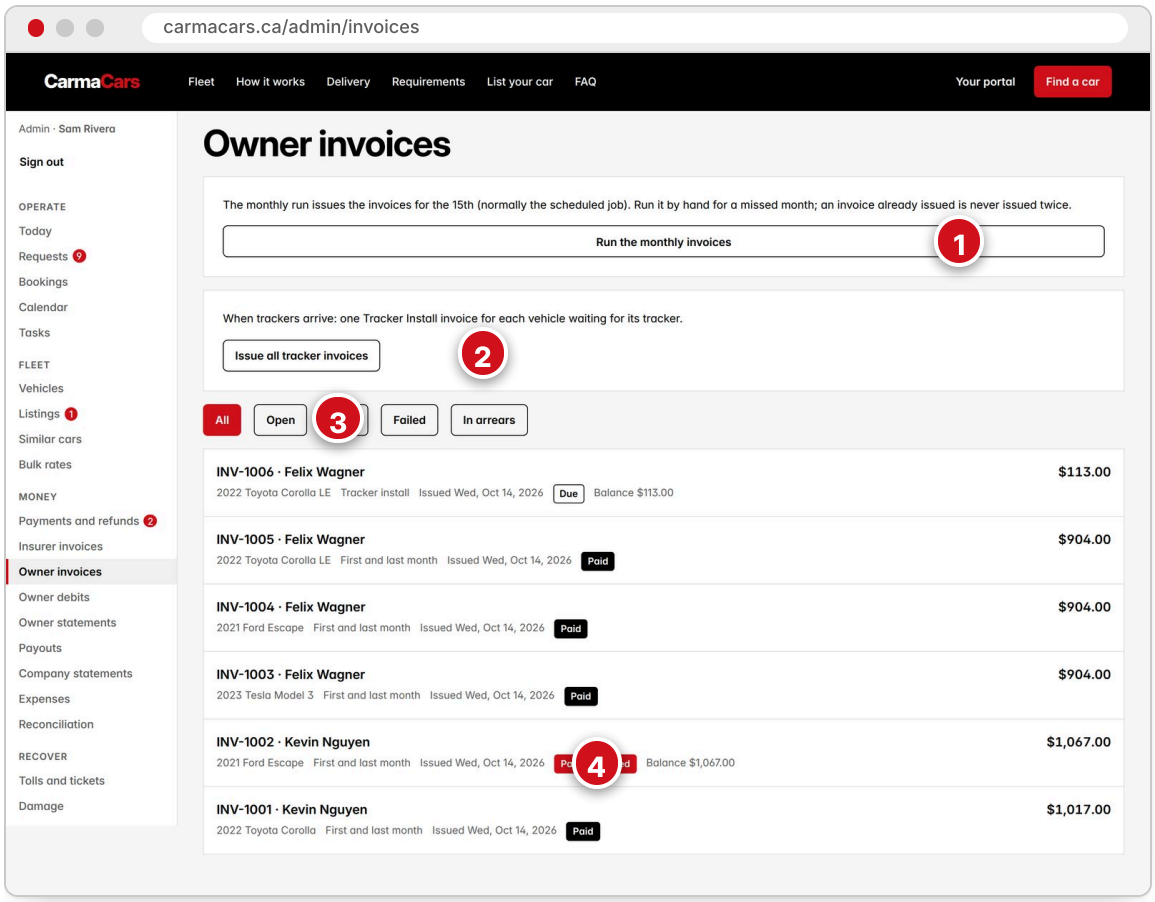

Money › Owner invoices

1 **Run the monthly invoices** issues the invoices for the 15th by hand, for a missed month. An invoice is never issued twice.

2 **Issue all tracker invoices** bills the Tracker Install for each car waiting for its tracker.

3 Filter by Open, Paid, Failed or In arrears. Failed invoices show the reason.

4 Paid by e-Transfer, cheque, cash or bank transfer? Press **Record payment** under the invoice. Leave Amount empty for the full balance.

The automatic debit

The debit runs by itself. Your job is to watch for returned debits and owners without a mandate.

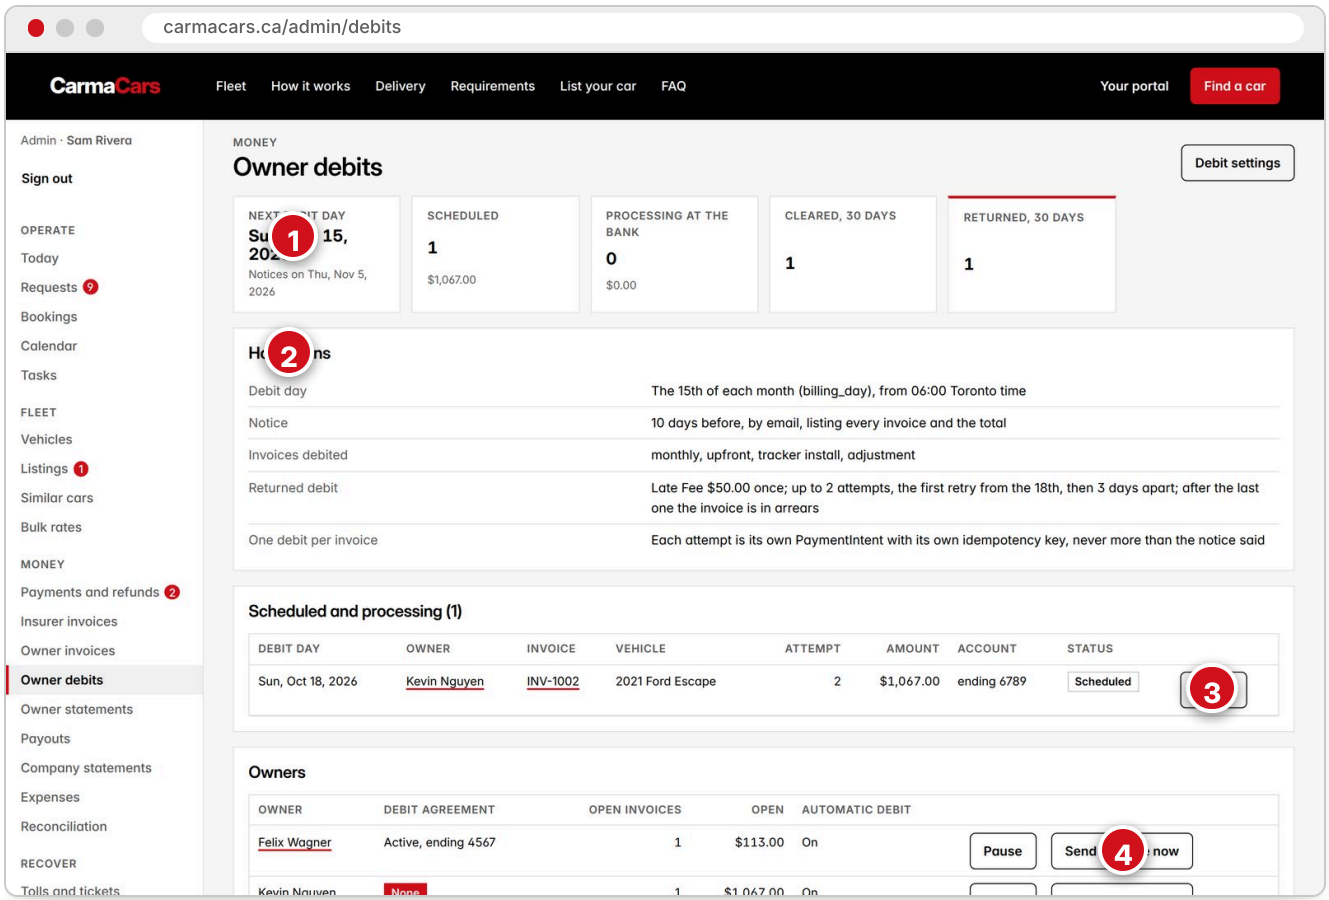

1	2	3	4	5
Notice day	**Debit day**	**Results**	**Retry**	**Arrears**
The 5th: invoices issued, one notice per owner	The 15th from 6:00: one debit per invoice	Cleared: paid. Returned: $50 Late Fee once	From the 18th: the second and last try	Returned again: a task and an email to you

1 The tiles show the next debit day and notice day, scheduled, processing, cleared and returned debits.

2 How it runs explains the policy in words, read from Program settings.

3 Scheduled and processing lists each debit. **Pause** holds one (a reason is needed).

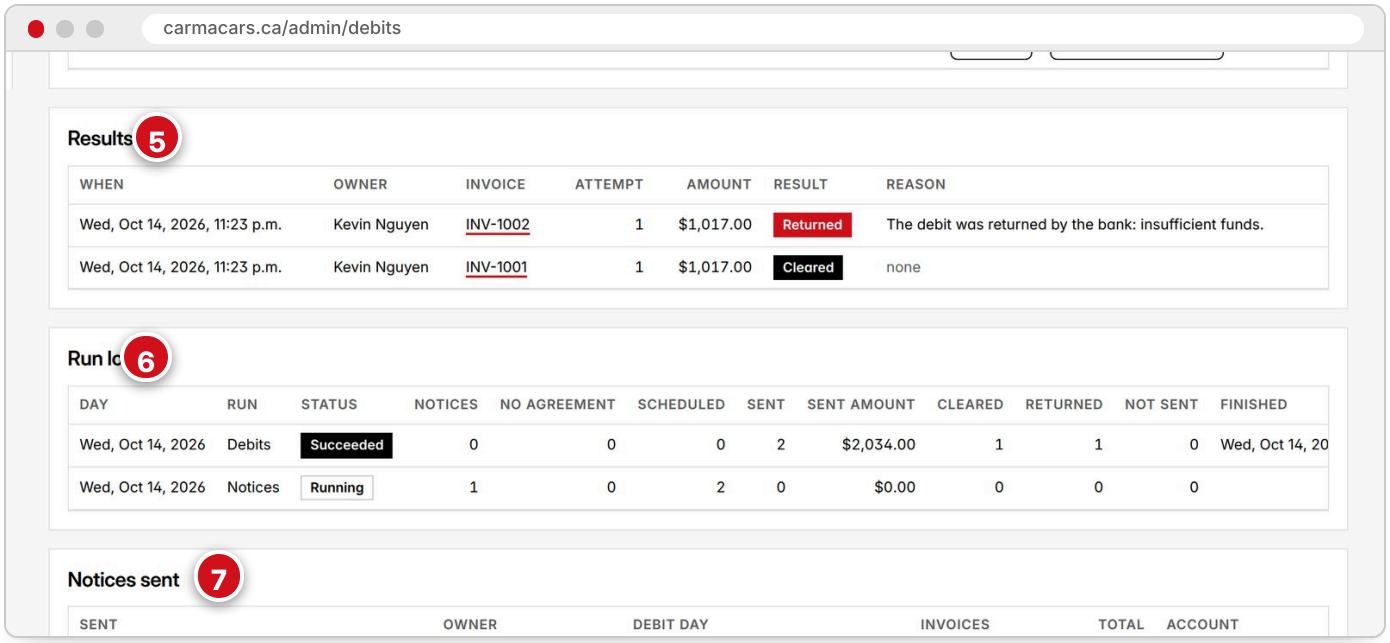

4 Owners lists each mandate. Use **Pause**, **Resume** or **Send a notice now**.

5 Results: each debit, cleared or returned, with the bank's reason.

6 Run log: each notice and debit run, with its counts.

7 Notices sent: who was told what, for which debit day.

WATCH OUT

A debit is never more than its notice said. An owner with no mandate gets an email on the notice day and you get a task; nothing is debited for them. Change the days, retries and Late Fee under Debit settings (Program settings).

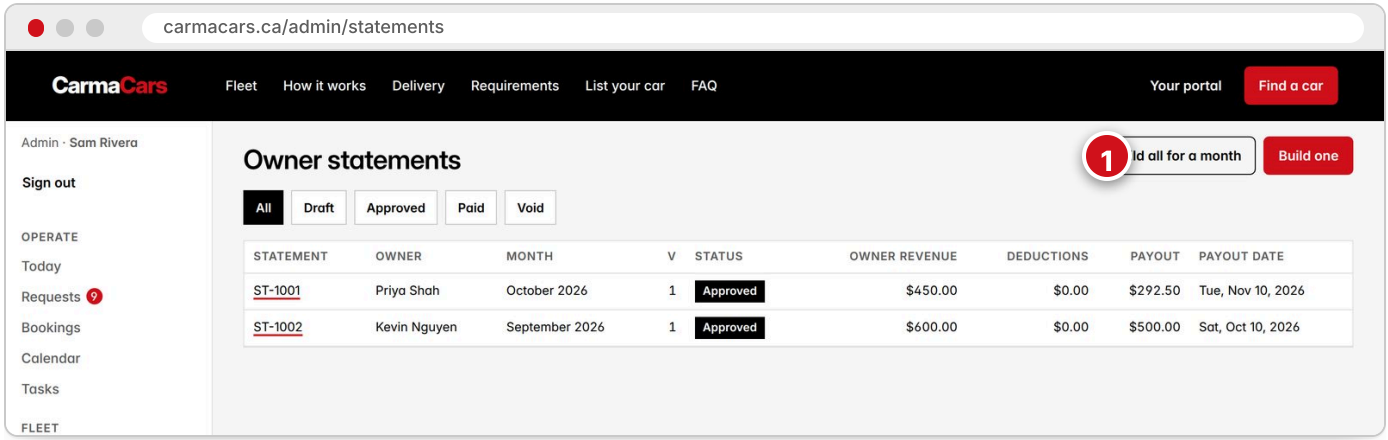

Owner statements

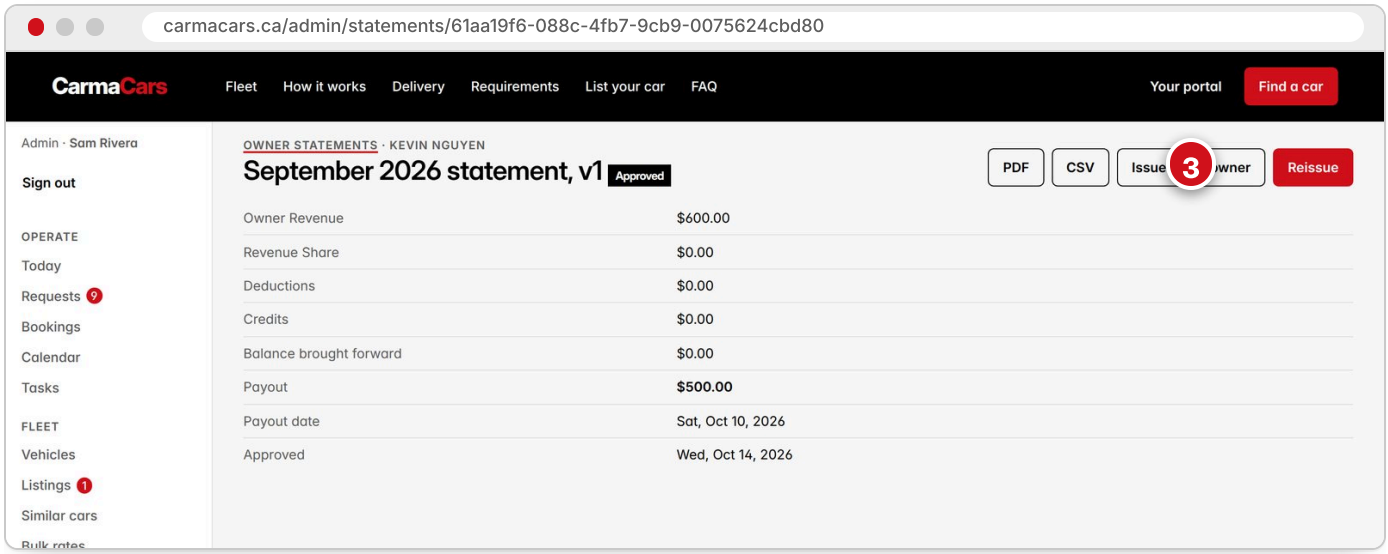

Money › Owner statements

1 Press **Build all for a month** (or **Build one**).

2 Open each draft. Check it, **Rebuild** after a correction, **Preview PDF**, then **Approve**.

3 Press **Issue to the owner**. **Reissue** sends a corrected copy; **CSV** exports it.

An approved statement: the owner gets it by email with the PDF on the 10th, and payouts follow under Payouts.

Company statements

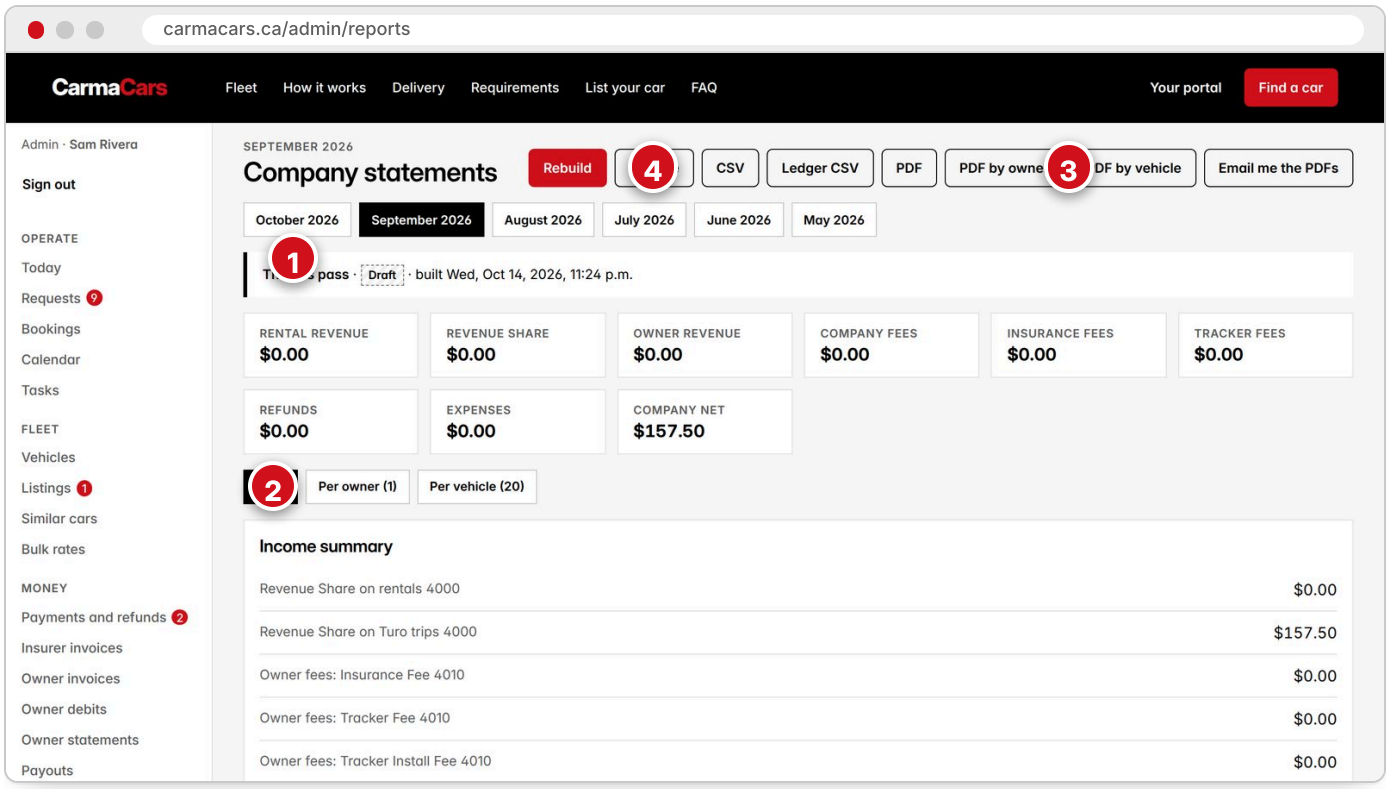

CarmaCars' own monthly statement, in twelve sections.

1 Choose the month. The tiles show revenue, fees, refunds, expenses and the company net.

2 Switch between Total, Per owner and Per vehicle.

3 Download **PDF**, **PDF by owner** or **PDF by vehicle**, or press **Email me the PDFs**.

4 **Finalize** freezes the month. **Rebuild** works until then.

CHAPTER 9

09 Tolls and tickets

Toll notices and tickets arrive by mail and email. Read them into the system, check each line against the notice, and the matching, charges and emails follow.

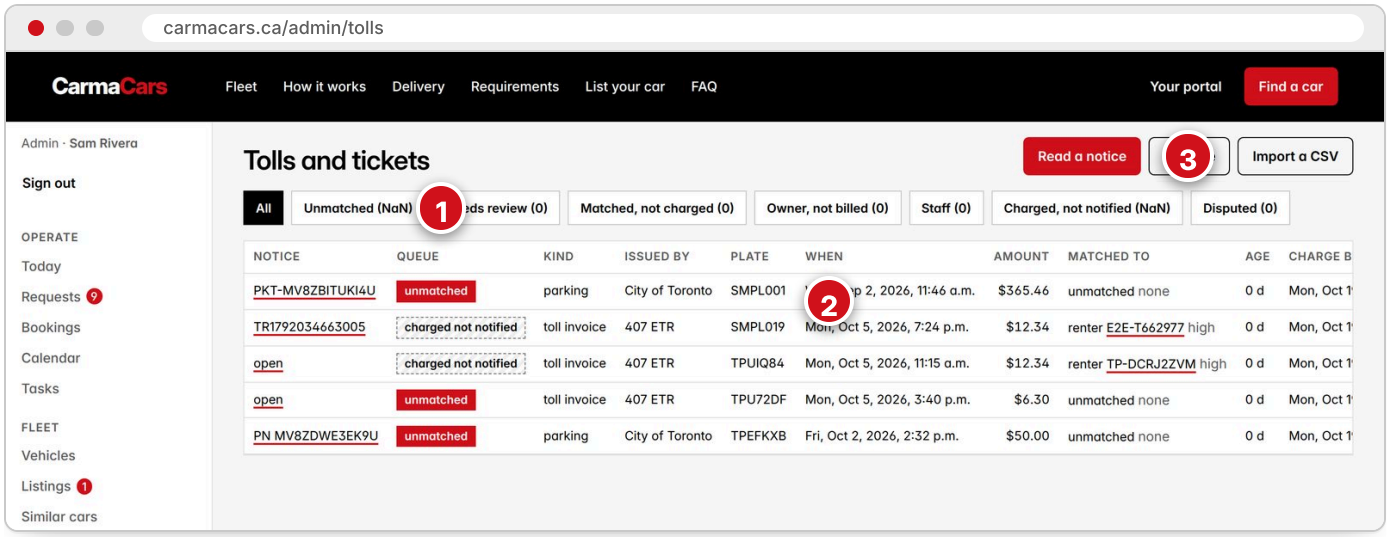

The work queue

Recover › Tolls and tickets

1 Filter the queue: Unmatched, Needs review, Matched not charged, Owner not billed, Staff, Charged not notified, Disputed.

2 Each toll shows its notice, kind, issuer, plate, when, amount and who it was matched to.

3 Add one by one with **Log one**, then **Save and match**. **Import a CSV** takes a statement file.

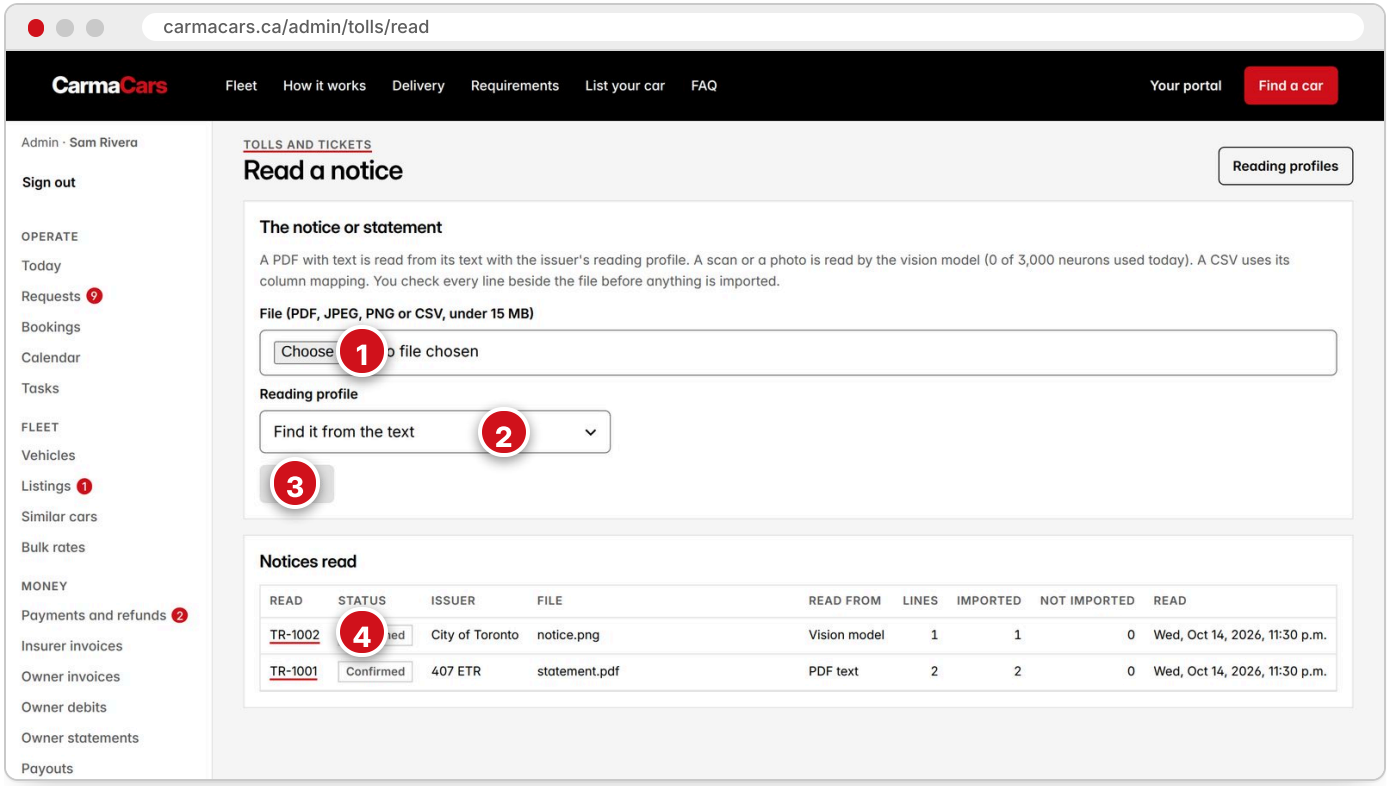

Inside a toll

1. Open a toll from the queue. Decide who pays: **Charge the renter**, **Bill to the owner** or **CarmaCars pays**.
2. Wrong notice? Press **Dispute**. Finance can also press **Match again**.
3. Reading profiles (top right on Read a notice) teach the reader an issuer's layout. Paste a notice's text under "Try it" to test one.

Read a notice

1. Press **Read a notice**. Choose the file: a PDF, a photo (JPEG or PNG) or a CSV, under 15 MB.
2. Leave Reading profile on finding it from the text, or choose the issuer.
3. Press **Read it**. The file is stored first, then read in your browser.
4. Notices read lists every read with its status and counts.

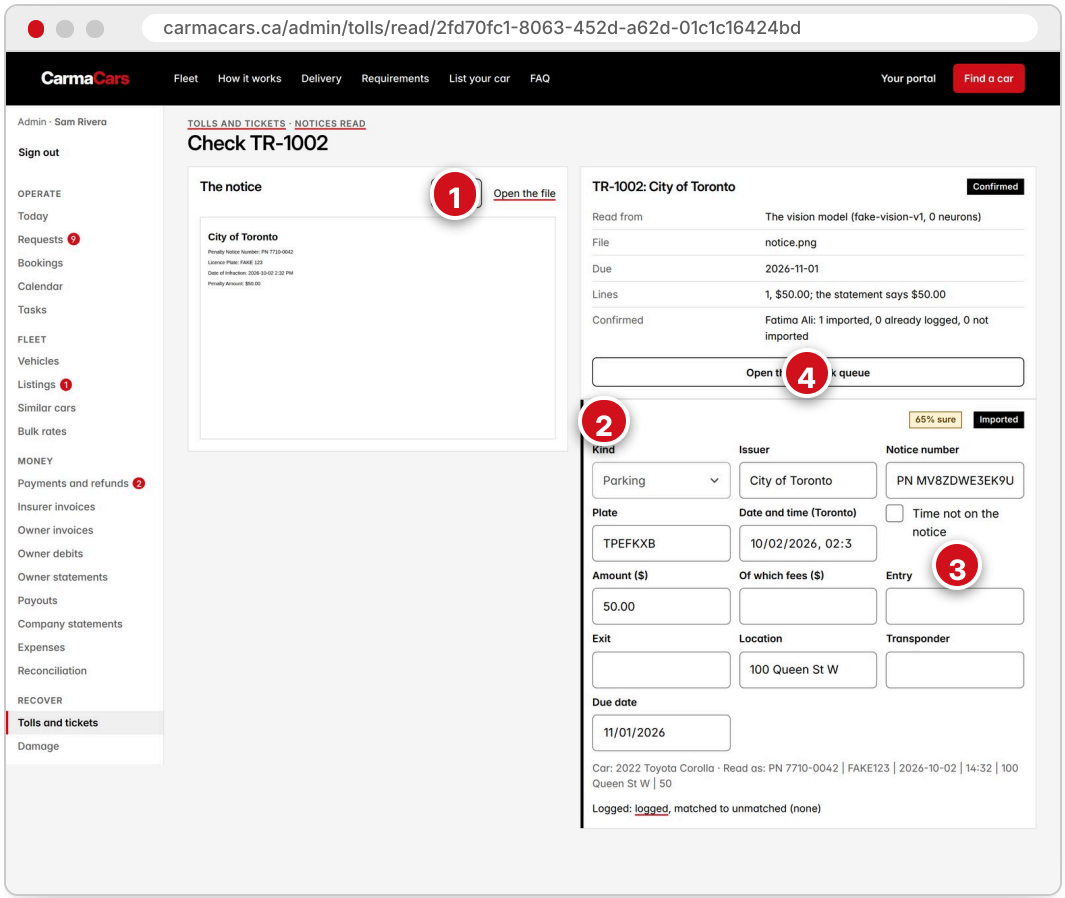

Check the lines and import

1 The notice is on the left (**Zoom**, **Open the file**). The lines are on the right.

2 Check each line beside the notice: kind, issuer, notice number, plate, date and time, amount, fees, due date.

3 Fix what was read wrong, then press **Checked against the notice**. **Leave out** skips a line; **Put it back** returns it.

4 Press **Save as checked**, then **Confirm and import**.

TIP

Renters matched with high confidence are charged at import, with the notice and the administration fee, when "Charge renters matched with high confidence now" is ticked. Other lines go to the work queue or stay as exceptions with the reason.

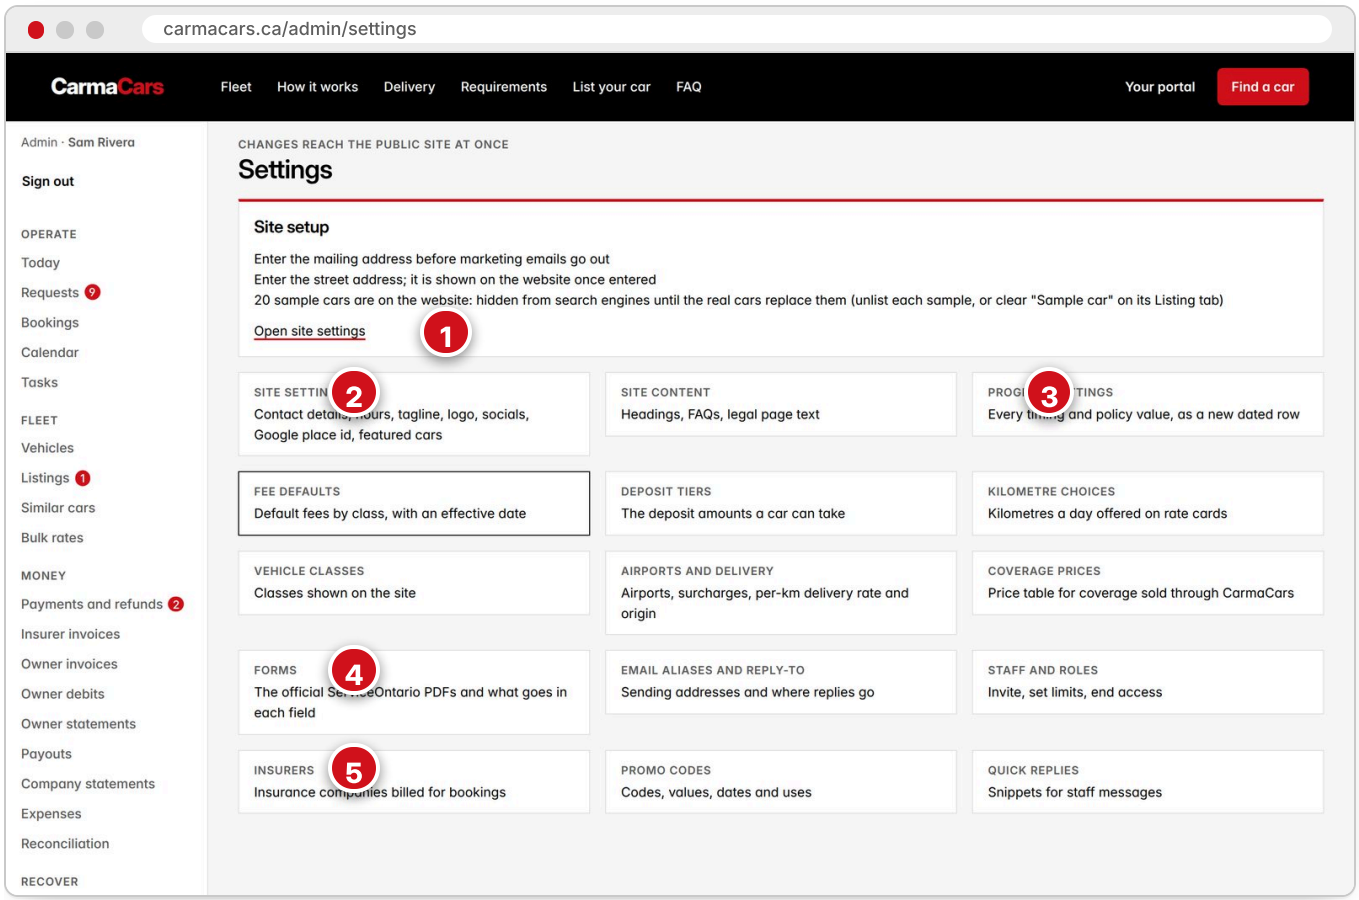

CHAPTER 10

10 Settings

Settings change the public site and the rules of the program at once. Program settings are kept as dated rows, so earlier values stay on record.

The Settings page

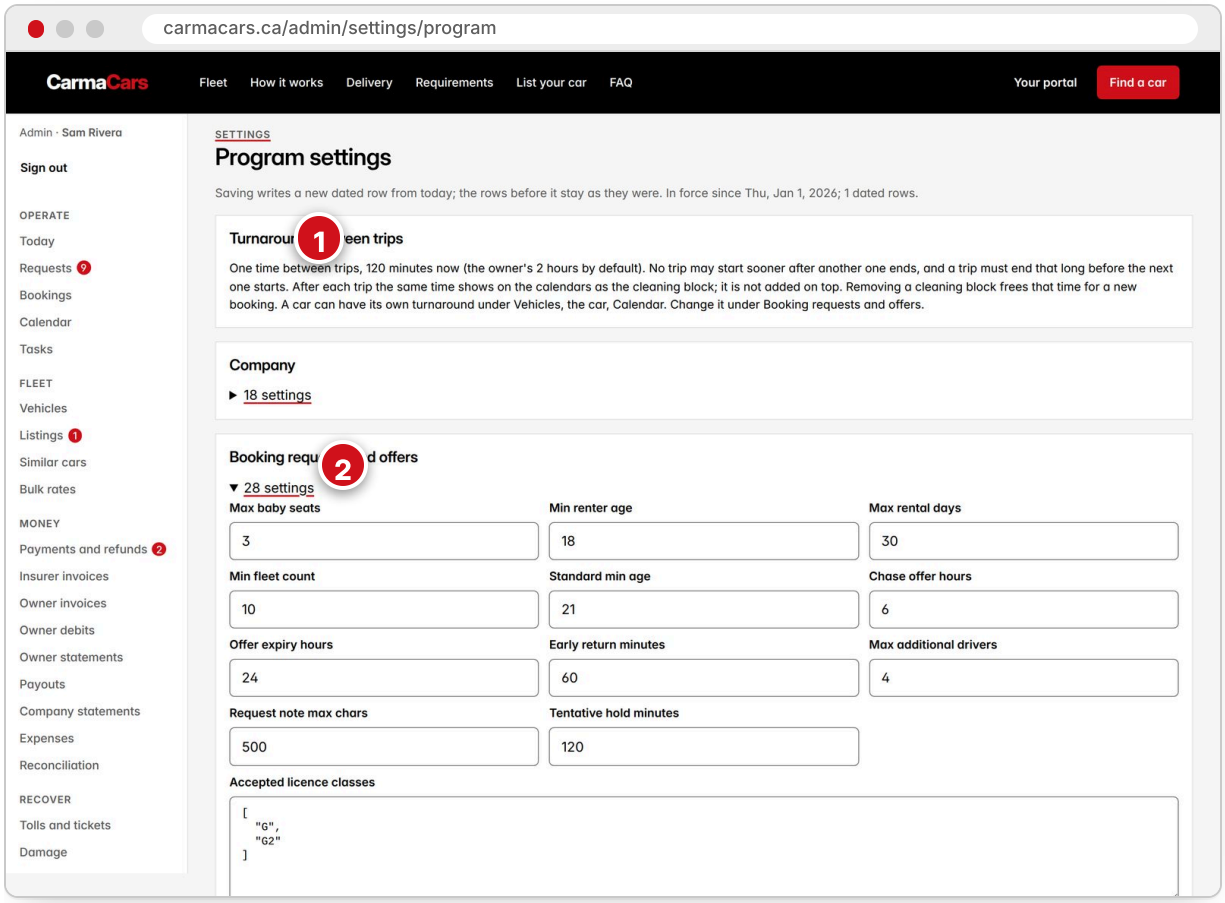

1. Site setup lists what is still missing on the public site, with **Open site settings**.
2. Site settings: contact details, hours, tagline, logo, socials, Google place id and featured cars.
3. Program settings: every timing and policy value.
4. Forms: the official ServiceOntario PDFs and what goes in each field.
5. Insurers: insurance companies billed for bookings.

The other tiles: Site content (headings, FAQs, legal text), Fee defaults, Deposit tiers, Kilometre choices, Vehicle classes, Airports and delivery, Coverage prices, Email aliases and reply-to, Staff and roles, Promo codes and Quick replies.

Program settings

1. Turnaround between trips: the time held between two trips. The cleaning block after a trip is this time.
2. Settings come in groups such as Company, Booking requests and offers, Owner debits and statement emails, Deposits, Delivery, Owners and fleet, and Tolls and damage. Open one to see its fields.
3. Change a value and press **Save**. It is saved as a new row from today; the rows before stay as they were.

Official ServiceOntario forms

The five official forms are loaded with a draft mapping to the owner, car, company and lender details. Until you check a form, owners get a data sheet with the values.

1. Open **Settings › Forms**. Each form shows "Mapping to check" (a draft is ready) or "Official PDF in use". Its notes say what the form is for and which boxes are left blank on purpose.

2. Press **Download a filled preview** for one car and check each value against the form.

3. Change a field if needed: What goes in it (or "The owner signs here"), a Format (for example YYYY/MM/DD) and Only when. Press Save the mapping.

4. Press **Checked: use for owners**. Every owner's form of that kind is filled again, except ones already signed or filed, and owners sign it with their other documents.

5. A new version from ServiceOntario? Press **Upload the official fillable PDF**: the fields of the same name keep their mapping.

> **GOOD TO KNOW**
>
> SR-LV-006 (registration), SR-LV-012 (two registrants), ON00453 (a company's RIN), 013-1155 and 013-0169 (the tax-exempt transfer into an owner's corporation). 013-1155 is sworn before a commissioner, so it is printed and signed in person.

Agreements to sign: investors and staff

Investment agreements and staff agreements are made from the person's record and signed in their own portal, or on paper.

1. Investor: open **People** › **Investors** and the investor. Under Investment agreement, press **Send the agreement to sign**. Check the values it is filled with (amount, yearly percentage, dates, exemption) and press **Send to sign**.
2. Staff: open **Settings** › **Staff and roles**. Under Staff agreements, press **Send the agreement to sign** beside the person. Rate, hours and the other values start from the staff profile and Program settings; change any before sending.
3. They get a notice, check the key values and sign in their portal in a few taps (their name is the signature, or they draw it). The signed copy is filed with their documents.
4. Your own PDF instead? **Send a PDF to sign** still works.
5. Signed on paper instead? Press **Record paper signature** in the same place and upload the scan.
6. Sent by mistake? Press **Withdraw** and give the reason.

The user guides

Settings › **Guides**. The guide of each portal, as people read it under Guide.

1. Each guide shows its version, when it was published and whether there are unpublished changes.
2. Open a guide and press a section. Change its text and press **Show the preview** to see it as people will. Press **Save the draft**; each save is kept in the section's history.
3. Move a section with the arrows, hide it, or press **Add a chapter**. Upload a screenshot under Screenshots and paste the line it gives you.
4. Press **Publish version** (the next number). The portals show the new version at once.
5. The stored PDF is printed again by the guides-pdf workflow. Until then the guide says the web guide has newer edits.

Keeping the screenshots current

The guides workflow retakes every screenshot and replaces the ones whose screen changed.

1. A guide with screens that changed shows **To review**; the section shows **Needs review** with the screenshot before and now (the new one is already in the guide).
2. Read the text against the new screenshot. Press **Suggest a text update** for a suggestion from Workers AI, then **Use this text as the draft** or **Dismiss the suggestion**.
3. Press **Mark reviewed**, then **Publish version** when the text is right, and run guides-pdf for the PDFs.

Insurers and the other lists

1. Open Insurers. Each insurer on file opens to edit its billing contact, email, phone, address and notes.
2. To add one, fill in the Add form (Name, Billing contact, Billing email and the rest) and press **Add**.
3. Deposit tiers, Kilometre choices, Vehicle classes, Airports, Promo codes and Quick replies work the same way.

CHAPTER 11

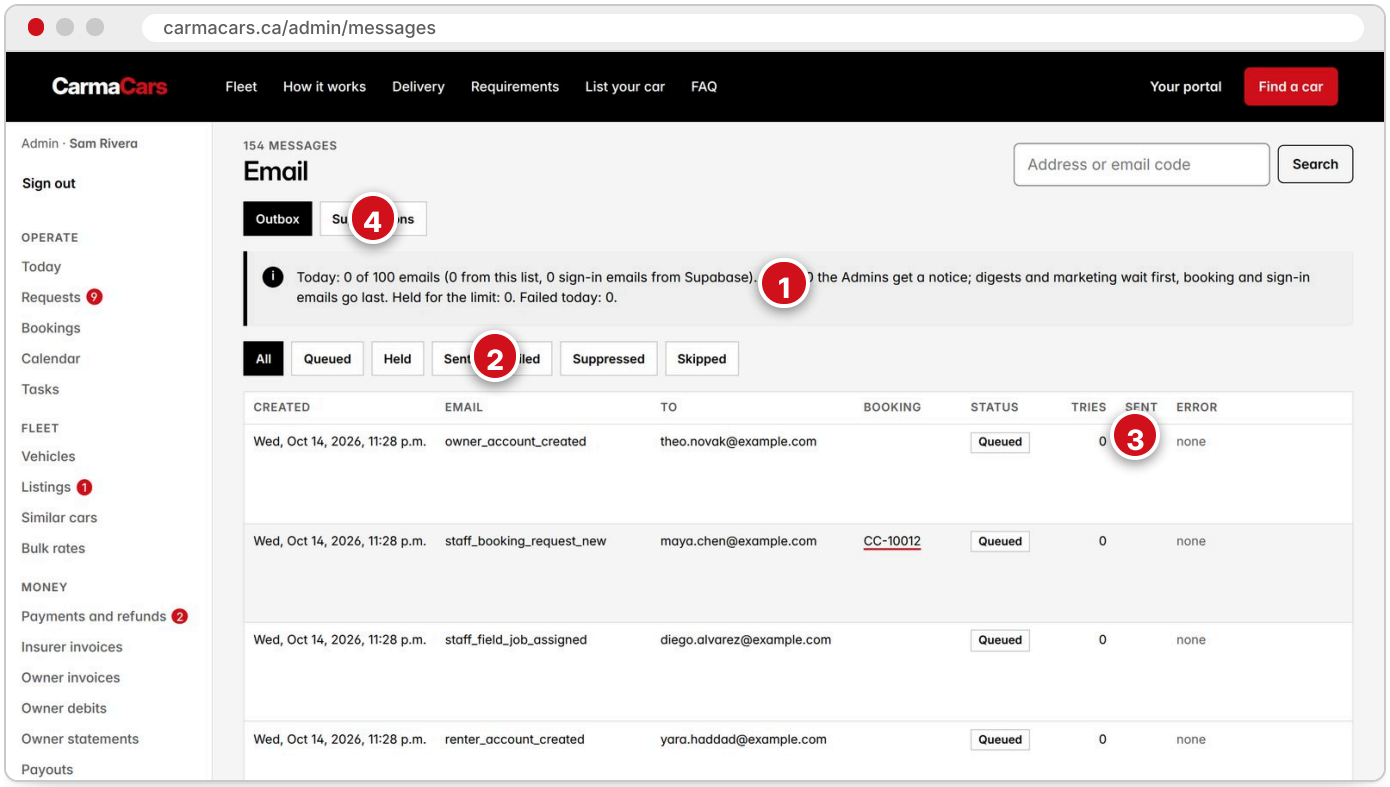

11 Email, backups and site health

Keep an eye on email use against the daily limit, the nightly backup and the occasional error page.

Email

People › Email

1. The banner shows today's emails against the daily limit. From 80, Admins get a notice; near the limit, digests and marketing wait first and booking and sign-in emails are held last.
2. Filter the Outbox: All, Queued, Held, Sent, Failed, Suppressed or Skipped.
3. Open an email to **Resend** or **Cancel** it.
4. Suppressions: **Suppress an address** stops all mail to it; **Lift** undoes it.

Backups

- The database is backed up every night, encrypted, kept for 30 days and test-restored on the spot.
- Every Monday the newest backup is checked again: it must be under 30 hours old and restore cleanly.
- Nothing is emailed. A failed backup shows as a failed scheduled job under Alerts on Today. Tell your developer the same day.
- Keep a copy of the backup key in the company password manager. Without it no backup can be read.

When a page shows "Error 1102"

Our web host's free plan sometimes stops a page that takes too long. Reload the page; you are still signed in. Moving to the Workers Paid plan removes it.

   Build all for a month, Approve, Issue

If something goes wrong

A link says it expired	Links in our emails work for 24 hours, once. Press **Send me a new link** on that page.
"Error 1102" on a page	A short limit on our web host. Reload the page. You are still signed in.
"That email and password do not match an account."	Check the address, or use **Set a new password** on the sign-in page.
You can't change anything	You are viewing as someone. Press Exit on the red banner.
Asked for a 6-digit code	Open your authenticator app. Lost phone: remove the factor in the Supabase dashboard.
